A MONDAY MORNING RESUME OF ALL BU ROLL BID AND ASK PRICES AS THEY CLOSED FRIDAY ON THE U.S.C.E. TELETYPE

CENTS

The cent market was generally quiet with a few notable exceptions.

- 1938-D — Some action around the \$110.00 range.
- 1938-S — Fairly active at about \$170.00.
- 1947-S — Prices strong — low volume.
- 1954-P — Considerable action — seems under priced at \$20.00 - \$21.00.
- 1954-S — Price seems to be firming up after being in the doldrums for about six months.
- 1955-S — Still low volume but shows some indications of increasing activity.
- 1958-P — Fair volume at around \$3.55-\$3.65 in bag lots. Smaller lots slightly higher.
- 1960-P — (small date) Tremendous activity for the second week in a row, with standing orders at \$170.00 for up to bag lots. Some sales at \$175.00.
- 1960-D — (small date) Steady buying pressure forcing prices up. Shows indications of a steep price rise very shortly. If you need these for stock, better buy now.

NICKLES

A very active group as a whole. Interest seems to be slowing in the silver nickel sets. However, the keys in the set are still in demand.

- 1938-P — Bids up to \$52.50 have not yet led to many sales.
- 1939-S — Some sales at around \$415.00.
- 1943-D — Still quite active as the key of the war nickel sets.
- 1946-S — Still in demand.
- 1947-S — Keeps going up. Lots of interest.
- 1948-S — Not much volume yet but asking prices are holding at a high level. More buying pressure could force a price spiral.
- 1949-S — Prices steadily rising and interest increasing.

- 1950-P — Seems to be slowing down a bit.
- 1950-D — Very active at around \$460.00, still rising - good volume.
- 1952-S — Very active at \$24.00 at one time. Seems to be slower now.
- 1953-S — Good volume at up to \$26.00 Has now slowed down considerably.
- 1954-S — Very active in the \$13.00-\$14.00 range.
- 1955-P — Seems to have settled in a groove at \$65.00. Still quite a few sales at this price.
- 1958-P — Considerable action in the \$20.00-\$21.00 range. Seems under priced in view of the prices of the 1952-S and 1953-S.
- 1959-P — Quite active in bag lots at around \$7.00.

DIMES

Activity seems to be picking up in dimes generally with the 1955 group leading the way.

- 1955-P — Activity in the \$40.00 range.
- 1955-D — In view of the activity of other dimes in this group, seems under priced.
- 1955-S — Very large trading volume with prices at about \$30.00 the first of the week. Buying pressure forced prices to \$35.00 bid and \$39.00 asked during middle of week. Week ended with volume still strong at about \$33.50.

QUARTERS & HALFS

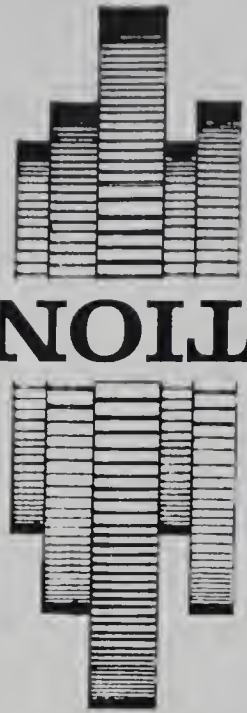

Generally slow with more sell offers than bids.

PROOF SETS

Activity in proof sets seems to be increasing at a steady rate.

- 1955 — Volume fell off after last week's price rise.
- 1960 — (small date) Price rising - great demand.
- 1963 — Hard to get.

NATIONAL COIN BROKERS Bulletin

WHAT is the National Coin Brokers Bulletin?

The National Coin Brokers Bulletin is an up-to-the-minute statistical analysis of the BU Roll business as transacted on the United States Coin Exchange Teletype service.

WHO can use the National Coin Brokers Bulletin?

National Coin Brokers publishes the Bulletin for **Coin Dealers Only**. The information contained within should be treated as confidential both in your own interest and that of your fellow coin dealers. California residents will need a State Board of Equalization resale number.

WHY do you need the National Coin Brokers Bulletin?

Time is the essential factor in determining the worth of the Bulletin. Immediately following the close of business on the U.S.C.E. Teletype every **Friday afternoon** the Bulletin is prepared. Rapid processing techniques are applied to all production phases of the Bulletin, making it possible for you to have a complete resume of the previous week's business on a national scale on your desk ready for use the following **Monday morning**.

Each issue also contains a market analysis newsletter which probes the past week's pricing data, examines market trends and offers a variety of pertinent marketing data of interest to all coin dealers.

WHAT additional service does my subscription fee include?

In addition to the weekly Bulletin, the National Coin Brokers Exchange offers a complete Brokerage Service on BU Rolls and Proof Sets to all subscribers. We will place your buy or sell order on our teletype for the low brokerage fee of 3%, with a minimum of \$3.00, maximum \$100.00 commission on any one completed transaction. You are also invited to phone the Exchange at any time for up-to-the-minute quotations on any item in which you have an interest.

HOW much will this new service cost me?

The National Coin Brokers Bulletin provides the dealer with a complete brokerage and information service at minimum cost.

Rates: One year - \$50.00 — One quarter (13 weeks) - \$15.00. **SPECIAL** Introductory Offer to acquaint dealers with our service — One quarter - \$12.00, if mailed within five (5) days. If it is more convenient, simply phone us your order and we will begin your subscription immediately and bill you.

SMALL DATES STILL MAKING NEWS

WAR NICKELS BACK OFF

—

PROOF SETS THE NEW RAGE

CENTS

There may be faint stirrings of renewed interest in the better cents with a slight increase in volume in the 50 to 100 million group.

1948-S--Volume definitely picking up with several fair sized lots sold at \$27.00 and \$28.00.

1949-S--Interest mounting with investors buying what seems to be an underpriced coin. Volume still only fair.

1954-P--Prices seem firm at around \$22.00. Volume still low.

1954-S--Has not made its move yet.

1955-S--Activity last week indicated that this coin might be ready to make a move. This week it settled back into its old rut with some sales at \$26.50.

1958-P--Volume good at around \$3.65.

1960-Psm.dt--This coin seems destined to become another '31-S and in much shorter time. Volume quite heavy this week at \$200.00, with large dealers taking all offers and buying unlimited amounts. Small dealers must pay up to \$210.00 to obtain coins.

1960-Dsm.dt.--Dealers are offering to buy in large lots of up to 5 bags at \$8.25. Offers to sell are very limited, with a few rolls available at \$8.50 and \$9.00. Volume is being held low because of a reluctance to sell. As buying pressure builds up from the public and investors, there should be a very sharp price rise in this roll.

NICKELS

Nickels as a whole seem to be slowing down. There are outstanding exceptions such as the 48-S and 49-S.

1938-P--This roll seems to be practically unobtainable in quantity. Offers of up to \$52.50 have brought, at the most, a few rolls into circulation. This may be due to the fact that the new red book lists the correct mintage of 19.5 million whereas the 1963 book had it listed as 79.4 million. This coin could very easily hit the \$100.00 range this year.

1943-D--Interest in this roll seems very low with very low volume in the \$100.00 to \$110.00 range.

1946-S--Volume still fairly good.

1947-S--Slowing down.

1948-S--Lots of interest, seems headed upward.

1949-S--Offers of up to \$100.00 have still produced no volume. Opinion seems to be that bids must reach or surpass the price level of the 1950-P nickel before any volume will be achieved. The true volume level for this roll could well be \$150.00 or more.

1950-P--Low volume, prices off slightly.

1950-D--Good volume, prices rising slowly but steadily.

1955-P--Low volume, prices steady at \$65.00 bid, \$70.00 ask.

1958-P--Low volume, price seems to be weakening.

1959-P--Fair volume, price seems to be going up with most offers in the \$7.50 - \$8.00 range.

DIMES

No unusual activity in dimes.

1955-S--Standing bids of \$35.00 per roll in unlimited quantities force the smaller buyer to pay \$35.50 - \$36.00 for his needs.

QUARTERS AND HALVES

Slow advance in price in the better dates, otherwise nothing unusual.

PROOF SETS

Proof sets are the new rage of the buying public with price increases all along the line.

1936 - 1942--Demand and volume good with prices rising in almost every instance.

1950--- Strong demand forcing prices up.

1953--- Demand increasing.

1954--- Strong demand, large volume.

1956--- Very large volume, price rising rapidly.

1960--- Good volume.

1960-sm.dt.--- Tremendous demand with standing orders at \$24.00. Small buyers must go higher. Most offers to sell are in the \$26.00 - \$26.50 range.

1963--- Prices and volume down slightly. The shortage scare seems to be abating.

HOLIDAY TRADING DULL

SMALL DATES MAKE GAINS - PROOF SETS OFF SLIGHTLY

BU ROLLS

CENTS

With the exception of small dates, trading in cents during this holiday week has been very slow.

- 1948-S--Low volume
1949-S--Some interest, but low volume
1954-P--Some demand at around \$21.50
1955-S--This roll is still backing off and no one seems to know why. This week saw several large lots traded at \$25.50 and some sales at \$26.00. The consensus of opinion now seems to be that this coin may sleep all through the slow summer months.
1960-P sm--Still good volume but the big rise may be about over. Bids are now firm at \$205.00. For the first time in several weeks, rolls seem to be getting plentiful in the \$210.00 to \$215.00 range.
1960-Dsm--This roll is now the big news in small dates. Dealers are now offering \$8.75 for bag lots and are able to buy very little. Most bags being moved now are at the \$9.00 level with some asking prices as high as \$10.00. Volume is a little better this week, but most owners of these rolls seem to be waiting for a better price.

NICKELS

- 1938-P--Buying pressure steady; still low volume
1942-Pt2--Some interest at around \$165.00
1943-D--No buyers at these low prices
1946-S--Some interest; low volume
1947-S--No interest at increased asking prices
1948-S--Not too much action; some interest
1949-S--Lots of buying pressure on this roll, but bids seem to be stuck at \$100.00. This week saw the first offerings in several weeks. Asking prices were in the \$110.00 to 120.00 range, but so far no one has stepped up to this price.
1950-P--Increased bidding of up to \$125.00 seems to have put this roll back on its feet. Volume is still low, but now it seems due to a lack of sellers.

1950-D--This is probably the most consistent performer of all the nickels. Steady buying pressure has forced the bid price to \$480.00 and the roll seems to be in short supply as there are now very few offers at any price. There is one solid bid of \$48,000.00 for a bag and no one seems ready to supply the demand. Gem rolls are now bringing \$500.00 and over.

1955-P--A definite increase in demand for this roll during the week. Bid prices first went to \$66.00, then to \$68.00, and now one dealer wants a half bag at \$70.00. There have been only scattered offerings of a few rolls at \$70.00.

DIMES

- 1955-P--Price on this roll has very definitely weakened this week, with asking prices as low as \$39.00 and few buyers.
1955-D--Very low volume, with some sales at \$30.00.
1955-S--Fair volume still at \$35.00 to \$36.50.

QUARTERS AND HALVES

Very slow with some demand for better dates.

PROOF SETS

Proof sets as a group are off a little this week. The situation seems to be brought about by the generally dull trading picture of this holiday week. Some dealers seem to be shaving prices in order to improve their volume for the week. This is very probably a temporary situation and the picture should improve next week.

- 1960-sm--Demand still strong with large sales at \$25.00.
1963--Small buyers bidding up to \$2.60, but the volume buyers are able to buy at about \$2.40.

CIRCULATED ROLLS

Circulated rolls seem to be gaining momentum with generally good action throughout the whole range of dates. A rather surprising development for the week was the increasing demand for 1958-P circ. nickels in large quantities at prices of \$4.25 to \$4.50 per roll.

PLEASE NOTE!

The prices in this Newsletter are wholesale prices, taken from dealer-to-dealer sales over national teletype services and other sources. From these prices, you may price your retail sales properly, replace your stock from the wholesale market, and realize a legitimate dealer profit.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

*An asterisk next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

PRICE SHAVING CONTINUES

DENVER SMALL DATES CONTINUE RISE - PHILADELPHIA SMALL DATES LEVEL OFF

BU ROLLS

CENTS

Price shaving was the order of the day for the Lincoln cents in particular this week. No large price reductions, but a dollar or two off most rolls seems to be the general trend. This could be an indication of a slow summer or it could be strictly temporary. We will know better in a week or two.

- 1939-S--Asking prices down about \$5.00 with no increase in volume.
- 1942-S--Price down about \$10.00; no volume.
- 1943-S--First price roll back in quite a while on this roll.
- 1947-S--Early in the week, asking price on this roll was down to \$20.00. The week ended with bid price firm at \$23.00 for fair-sized lot.
- 1948-S--Low volume, but holding firm on price.
- 1949-S--Price fell off somewhat, seems to be a terrific investor bargain at this price.
- 1954-S--Asking price dropped to \$14.00 early in the week, ended with prices fairly firm at \$14.75 for large lots and \$15.00 in small quantities.
- 1955-S--Price firmed up this week with bag lots moving at \$26.00. Week ended with firm bids of \$26.00.
- 1958-P--Low volume; price up slightly and firm.
- 1960-Psm--The joy ride seems to be over on this roll. It hit its peak at \$205.00 and, as is usual after a rapid rise, has backed off slightly and now seems to be firm at \$190.00 bid and \$200.00 asked.
- 1960-Dsm--Still advancing in price and seems destined to go even higher. Volume is very low on this roll due to a reluctance to sell rather than scarcity.

NICKELS

Lots of jockeying around on asking prices this week with bids scarcer, but firm. Silver nickel sets down to \$610.00 bid.

- 1938-P--Same as last week; buyers willing, no sellers.
- 1942-Pt2--Price holding at around \$165.00.
- 1942-D--Last week's bid of \$375.00 still the best outstanding bid, with no takers that we know of. Several lower bids this week did not produce any sales.
- 1943-D--Price still slipping; no volume.
- 1947-S--Slight reduction in asking price did not stimulate any interest.
- 1948-S--Here again, price shaving produced no volume.
- 1949-S--A meeting of minds was finally accomplished at \$110.00 for this roll on a very low volume level.
- 1950-P--Low volume; prices holding fairly steady.
- 1950-D--This is without a doubt the outstanding steady performer in the entire BU Roll Market. Bids are now steady and quite numerous at \$500.00 per roll. Volume is still rather low and in this case the underlying reason seems to be scarcity. There may be a few large lots of these in the hands of investors, but they are definitely not for sale. Large inroads on dealers stocks of this coin are being made by singles sales to collectors and small collector-investors. This creates a very healthy market climate for this roll and promises a steady future.

- 1951-S--Slight increase in bid price this week; low volume.
- 1952-D--Some increase in activity.
- 1952-S--Definite increase in interest; prices up.
- 1955-P--Prices level again after last week's little flurry.
- 1958-P--Prices firmer at week's end.
- 1959-P--Slight price advance this week and indications are that the price will hold.

DIMES

The dime market has a slight shade of instability. This may be due to the fact that it has such a narrow base of really popular items on which to build.

- 1955-P--Seems a bargain at asking price of \$39.00. No takers.
- 1955-D--Same at \$29.50.
- 1955-S--Greatly reduced volume. Seems overpriced; when one major dealer stops buying, the market immediately reverses.

QUARTERS AND HALVES

- 1955-D Quarter--A highly stable performer. slow but steady price increases with consistently good demand.

PROOF SETS

Here too, price shaving has been rather consistent, especially in the earlier dates. However, volume has improved over last week with good demand.

- 1954--Good volume.
- 1956--Large volume mostly at \$6.25 with large demand yet unfilled at this price.
- 1960sm--Good volume, good demand at \$25.00 to \$25.50. This set has probably reached its peak and could level out at around this price.
- 1963--Volume lower; quiet.

CIRCULATED ROLLS

Asking prices on Circ. nickel rolls seem to be advancing with no increase in bid prices and very few sales. This is a rather odd situation that may clarify itself in a week or two.

CIRCULATED SINGLES

Prices are definitely advancing on key singles and some key in most all series. Sales are mounting in Mercury Dime in particular. This is also true in Indian.

Within the next week or two, we intend to start a weekly analysis of these groups along with BU and Circ. coins and proof sets.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

MARKET MAKES RAPID RECOVERY

DIMES MOVING AGAIN

-

WAR NICKELS HIT NEW HIGH

BU ROLLS

CENTS

The slump is over in Lincoln cents. Prices are firm again and volume is good.

- 1939-S--Price solid at \$60.00 and over with good volume.
- 1942-S--Moving again at about \$155.00.
- 1947-S--Bid price up to \$23.50 and firm.
- 1948-S--Price firm; no volume.
- 1949-S--Low volume; price firm at \$51.00 - \$52.50
- 1954-P--Price up at \$22.50 to \$23.00; firm.
- 1954-S--Good volume at around \$14.75.
- 1955-S--This roll may be finally hitting its stride. Demand, along with prices, advanced rapidly all week. The week ended with firm bids of \$27.00 for large bag lots and only a few offerings at \$27.50.
- 1960-P--Advanced strongly this week with more bids than offers. Week ended with bids at \$.89, offers at \$.93.
- 1960-Psm--Prices firm at \$197.50 bid, \$200.00 ask. Volume only fair.
- 1960-Dsm--This roll still advancing rapidly with most bids at \$9.50, a few offerings at \$9.75, and one bag lot sale at \$10.00.

NICKELS

Nickels advanced generally back to pre-holiday prices and beyond. The big news is the strong market in silver nickel sets with bids strong at \$625.00 and up to \$630.00 with few takers.

- 1942-Pt2--Sales reported at up to \$180.00; fair volume at lower levels.
- 1942-D--This roll kept advancing in price until it finally hit a level that produced sales at \$400.00. Still low volume.
- 1943-D--Price recovered lost ground with some sales at \$105.00.
- 1946-S--Seems to be moving some. Sales at \$52.00 indicate strength.
- 1947-S--Renewed interest; strong bids at \$47.00.
- 1948-S--Week ended with bids up to \$55.00; seems to be on the move with the rest of the market.
- 1949-S--Very little action this week.
- 1950-P--Good volume with prices off slightly.
- 1950-D--Bid prices now at \$520.00 and still moving ahead strongly.

1955-P--Moved up sharply during week, then fell back to former level.

1959-P--This roll made a surprisingly strong move this week and ended up at \$8.25 bid and no offers.

DIMES

Dimes made a very strong recovery this week with several of the scarce dates making good price advances. The 1955 group all firmed up with prices equal to or above the pre-slump period.

- 1949-S--Some action; low volume.
- 1950-S--Strong price advance; best in weeks.
- 1953-S--Vastly improved action.
- 1954-S--Much more interest.
- 1955-P--Good price recovery; moving at around \$41.00.
- 1955-D--Firming up.
- 1955-S--Firm at about \$35.00, buy or sell

QUARTERS AND HALVES

Both these items moving much stronger than usual with good volume all along the line.

1955-P Halves--Very strong demand forced bid price up to \$23.75 at end of week. Looks as though it could go even higher.

PROOF SETS

Prices on proof sets are moving up again; good volume, especially in the earlier dates.

- 1936--Sales at \$400.00.
- 1950--Tremendous gain for one week's trading. Prices moved up rapidly to include bids of \$90.00 for 100 set lots. Demand still not filled at this price. Scattered offers at \$100.00.
- 1955--Backed off slightly with offers to sell at \$10.25 and \$10.50 with no volume achieved.
- 1956--Slight price advance to \$6.35 bid with good volume at this price.
- 1960sm--Price still moving up. Firm bids now at \$26.00 for 100 lots. Offers light at \$26.50, firm at \$27.00.
- 1963--Price jumping around considerably with bids of \$2.60 for large lots during middle of week. End of week saw sales at \$2.47-1/2 and bids at \$2.45.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

*An asterisk next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

SMALL DATES HIT NEW HIGHS

ENTIRE MARKET ADVANCING

SCARCE DATE NICKELS SET NEW RECORDS

BU ROLLS

CENTS

A generally firm market in cents this week, paced by firm advances in several instances.

- 1947-S--Made steady advances all week with a final bid of \$25.50 and no offers to sell at this price; low volume.
- 1954-S--Still good volume between \$14.00 and \$15.00; No significant price change.
- 1955-S--Selling readily at \$27.00 or less, meets resistance at ask price of \$27.50. Good volume.
- 1958-P--Price firm at \$3.75 for bag lots. Higher in smaller quantities. Low volume.
- 1959-P--Price holding up. No volume at bid price of \$1.16 or ask price of \$1.40.
- 1960-Psm--This roll hit a new high this week at \$210.00 bid, \$215.00 ask. Week ended with activity down somewhat from the middle of the week. Volume still good.
- 1960-Dsm--Good volume in bag lots selling at \$1,000.00 per bag with bids outstanding at this price. The only sell price mentioned toward the end of the week was \$1100.00 per bag.

NICKELS

The nickel market moved forward this week with stunning advances in certain scarce date rolls. War nickel sets were up to \$640.00 bid at one time.

- 1938-D--Bid price up slightly at \$250.00; low volume.
- 1938-S--Fair volume at around \$290.00.
- 1942-D--Phenomenal rise of almost 10% in one week. Bids of \$430.00, asking price \$440.00. Low volume even at these prices.
- 1949-S--Increased volume this week at around 105.00. More interest could send this roll on up.
- 1950-P--Increased demand with many bids at \$125.00 and some at \$130.00.
- 1950-D--This fantastic coin seems to be the pace setter for the entire BU Roll market. Strong bids up to \$550.00 produced some sales. Many asking prices are being held as high as \$600.00 in anticipation of a continued price rise. In view of the consistent demand, this does not seem unreasonable. Some choice rolls have already been sold at well over \$550.00.

- 1953-S--This roll made an extremely strong move during the week with bids to \$28.50 and no offers. Sales earlier in the week in fair volume at lower prices.
- 1955-P--Very good demand and good volume at \$70.00.
- 1959-P--A good strong market for this roll with firm bids for large quantities at \$9.00. Volume still only fair.

DIMES

The dime market is still strong this week, paced as usual by the 1955 group.

- 1955-P--This roll coming back into its proper perspective in relation to the other rolls in the group. Strong buying pressure forced price up rapidly to \$44.00, still producing little volume. Small offerings at \$45.00; volume offers at a higher level.
- 1955-D--Still steady at \$30.00 to \$31.50; low volume. A little buying pressure could force this price up to its proper relationship with other 1955 rolls.
- 1955-S--Steady at \$35.50 to \$36.50; fairly low volume.

QUARTERS AND HALVES

Both are moving well in the better dates; strong advances in certain areas. Many of the lower priced later dates are also moving well.

- 1955-D Quarters--Still moving strongly with good demand and good volume at the new high of \$60.00.
- 1955-P Halves--Strong price advance with large volume for this roll at \$25.00 asking price.

PROOF SETS

The proof set market is still very much alive with an upward trend still led by the '60 small date.

- 1936--Good demand at \$410.00 to \$415.00; no volume.
- 1950--No volume; asking price firm at \$90.00.
- 1955--Picked up a little with bid price of \$10.50; low volume.
- 1960sm--Still making news in the proof sets, with bids met at \$28.75 and \$28.50. Large volume bids of \$28.00 still unsatisfied. Light offerings at \$33.50; volume light.

PLEASE NOTE!

The prices in this Newsletter are wholesale prices, taken from dealer-to-dealer sales over national teletype services and other sources. From these prices, you may price your retail sales properly, replace your stock from the wholesale market, and realize a legitimate dealer profit.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

*An asterisk next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

ENTIRE ROLL MARKET ADVANCING

SCARCE DATE ROLLS IN ORBIT - PROOF SETS VERY STRONG

BU ROLLS

CENTS

The cent market was fairly quiet this week with a few notable exceptions. Prices as a whole remained firm with most changes on the plus side.

1947-S--Small advance to \$26.00 bid with no offers to sell at these higher prices. Low volume.

1955-S--Much lower volume of sales this week with one bid advancing to \$27.50. Many bids in the \$26.00 to \$27.00 range produced no sales. Ask price still firm at \$28.00.

1960-Psm--Another stunning advance this week with firm bids at \$235.00 per roll from large investment buyers. Fairly good volume as this roll made its upward move. Week ended with only scattered offerings at \$237.50 to \$250.00. Some bids and sales at \$240.00.

1960-Dsm-- This roll seemed to meet price resistance this week at prices above \$10.50. Fair volume at this figure with practically no sales at higher asking prices, which were mostly \$11.00 for volume offerings.

NICKELS

Aside from the small date cents, the nickel market probably made the most spectacular and consistent advances this week. War nickel roll sets were \$640.00 bid and \$650.00 ask, with several sales at the higher figure. Single BU Jefferson sets were \$127.00 bid, \$128.00 ask.

1938-S--This roll may be ready for another move with large investment buyers now bidding \$315.00 for quantities. There has not yet been enough volume to qualify this upward trend; however, the buying pattern is the same as that which forced up prices on the 1960-Psm and the 1950-D and 1942-D nickels among others.

1942-D--Another spectacular advance this week with solid investment buying at \$475.00, forcing small buyers to bids of \$480.00 to obtain their needs. Still low volume.

1948-S--Moving upward with the general trend with sales produced by bids at \$60.00. Asking prices center around \$65.00; only fair volume.

1949-S--This roll also moving upward with fair sales volume mostly at the \$112.50 asking price.

1950-P--Price firm; low volume.

1950-D--This darling of the roll set continues its spectacular advance with strong bids at \$585.00 and scattered bids at \$600.00. The Denver Convention this week could make this roll the first Numismatic candidate for a trip to the moon, speaking strictly price-wise of course. Some choice rolls are already selling as high as \$625.00.

1952-S--This week's bid price of \$27.00 is already over last week's asking price; few offers to sell; volume fair.

1954-S--Price up to \$15.50 bid, \$16.00 ask.

1955-P--Price up; fair volume at around \$72.50 bid price.

1958-P--Renewed interest in this roll with prices up and firm at \$21.50 to \$22.50; shows indications of going higher; volume low so far.

DIMES

Dimes are well represented in this week's Numismatic stampede with good demand and solid price rises all along the line. BU roll sets of Roosevelt dimes are a firm \$2,000.00 bid and \$2,100.00 ask. Single sets are \$37.00 bid and \$42.00 ask. 1955-PDS roll sets are in good demand at \$107.50 to \$112.50.

1953-S--Many firm bids at \$27.00 with few offerings at any price. Volume fair.

1954-S--Price up to \$26.50 bid, \$27.50 ask with many more bids than offers; fair volume.

1955-P--Price holding steady after last week's price hike with the most emphasis on attempts to buy. Low volume.

1955-D-- As anticipated, this roll is now rising along with the rest of the 1955 group. Fair volume at \$31.50 to \$32.50.

1955-S--This roll is still going up under pressure from investment groups. Low volume at \$37.00 to \$38.50.

QUARTERS and HALVES

Scarce date quarters and halves are playing a definite part in the bull market on BU rolls.

1955-D Quarter--Still moving well with bids of \$61.00 and some asking prices being held as high as \$65.00.

1958-P Quarter-- Increased activity with good volume at \$20.00 to \$20.75.

1955-P Halves--Still moving strongly ahead with strong bids at \$25.00 and some ask prices held at \$28.50 for large lots. Volume low due to a reluctance to sell.

PROOF SETS

Demand for proof sets still much heavier than supply. Price advances on almost all dates.

1936--Solid bid now at \$430.00; no volume.

1950--Bid price now firm at \$100.00; low volume.

1954--Good volume at \$15.00 bid.

1955--Increased activity; some demand at \$11.50 bid, low volume.

1956--Good demand; good volume at \$7.50 bid.

1957--Good volume.

1958--Good volume at \$8.00 to \$8.50.

1959--Lots of interest; good volume at \$3.50 to \$4.00.

1960sm--Another week of steadily rising prices for this set. Firm volume bids at \$32.00, with some sales at \$33.00 to \$33.75. Volume offerings at \$33.00 with scattered small offers at \$33.00 and \$33.75.

PLEASE NOTE!

The prices in this Newsletter are wholesale prices, taken from dealer-to-dealer sales over national teletype services and other sources. From these prices, you may price your retail sales properly, replace your stock from the wholesale market, and realize a legitimate dealer profit.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

*An asterisk next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

DENVER PRICES UP

50-D NICKELS SOAR — SMALL DATES STILL RISING

CONVENTION NOTES.....

First unconfirmed reports from Denver are that collector attendance was disappointing while dealer interest and buying was very strong. These dealer purchases undoubtedly represent heavy investment buying which is of course the mainstay behind the present bull market in late date rolls. Reports are that dealers paid as high as \$800.00 for choice 50-D rolls, and that dealer-to-dealer sales of small date proof sets went as high as \$42.00 to \$45.00. 1955-S cents were reported to be moving well with a firm market at \$29.00. 1955 proof sets seemed to be in short supply and consequently did not get much action. War nickel sets were reportedly retailing at up to \$800.00 and one Jefferson roll set was said to have sold for \$6,250.00. These are of course unconfirmed sales and are not to be relied upon any more than any convention reports. Much of this action has not yet been reflected in teletype sales up to this time. Also, please remember that at the time this goes to press, the convention is still in session, and there could be further important developments on Friday night through Saturday.

BU ROLLS

CENTS

Cents are still very quiet, with most of the action confined to the late dates and small dates.

- 1947-S--Still moving up with strong bids now at \$27.50 and few offerings at any price. Light offerings at \$28.00.
- 1949-D--If you will check the BU roll prices in your Coin Dealer Newsletter of July 5, 1963, approximately one month ago, you will see that this roll was \$11.00 bid, \$13.00 ask. The price on this roll has risen steadily, week by week, until it is now \$25.00 bid and \$27.50 ask, a rise of well over 100% in one month. This roll has no discernable pedigree, so I can only suggest that this might be a roll to watch. It may be more scarce than people realize.
- 1955-S--This roll is moving again, and at the week's end, there are firm bids of \$29.50 for bag lots with very few offers to sell at any price. This coin is already showing a definite reflection of Denver prices.
- 1959-P--For the first time, bids are firm at \$1.20 for bag lots.
- 1960-Psm--This roll still continues its fantastic rise with almost hourly price increases toward the end of the week. By the time this reaches you on Monday morning, the bid price of \$260.00 and ask price of \$265.00 will probably no longer be valid. Good volume at these prices.
- 1960-Dsm--Fairly low volume; seems to have leveled off at \$10.75 to \$11.00.

NICKELS

Nickels still lead the bull market with consistent price increases in almost all dates. War nickel sets are again in their glory at \$665.00

bid, \$675.00 ask, with sales at both levels. BU roll sets are \$5350.00 bid and \$5395.00 ask with sales at the bid price.

- 1938-P--This roll made a significant move this week with bids of \$60.00 still producing no volume. Watch this roll.
- 1938-D--Seems to be getting stronger, but no significant price advance as yet.
- 1938-S--This roll is definitely gathering momentum with some bids for choice rolls as high as \$335.00. Low volume.
- 1942-D--Some offers to sell finally made an appearance at the \$510.00 level; still no volume.
- 1948-S--Increased activity; ask price steady at \$65.00.
- 1950-D--Another roll which is showing hourly price increases. Today's prices of \$675.00 bid and \$695.00 ask will probably be out of date by tomorrow. The Denver show is having a strong effect on this roll. Some asking prices are being held as high as \$775.00.
- 1955-P--Bid price up to \$76.00 with no takers to date. Most asking prices holding at \$77.50 to \$80.00. Low volume.
- 1958-P--Increased activity at \$21.00 to \$22.00; volume up.
- 1959-P--Continues its sustained price rise with bids at \$10.00 and most asking prices at \$11.00 or more.

DIMES

Activity in dimes is still good with the 1955 group leading the way. Asking price for 1955 PDS sets now being held as high as \$127.00.

- 1955-P--Steady buying pressure at \$45.50 with the only significant offering at \$49.50. These rolls seem to have gone into hiding.
- 1955-D--This roll is also now hard to buy with bids up to \$33.50, producing practically no offers to sell.
- 1955-S--Holding steady at about \$37.00 bid, with offers to sell varying all the way from \$39.00 to \$45.00.

QUARTERS AND HALVES

- 1955-D quarter--Good bids at \$61.00. Low volume; sellers reluctant.
- 1955-P halves--Extremely heavy demand; bids solid for volume lots at \$27.50, with the only response a tongue-in-cheek offering at \$40.00. This is a very scarce coin and could very well skyrocket in price in the near future.

PROOF SETS

PROOF SETS

Proof sets generally good with some price increase this week. Interest seems to be centered on the 1960 small date. In spite of the Denver reports of higher prices, the teletype prices seem to be steady at about \$38.50 to \$39.00.

A MONDAY MORNING REPORT ON THE WHOLESALE COIN MARKET AS IT CLOSED FRIDAY AFTERNOON

August 16, 1963

1955-S DIMES LEAD STRONG MARKET ADVANCE HEAVY DEMAND FOR WAR NICKELS AT ADVANCED PRICES

BU ROLLS

CENTS.

Most interest in cents seems to be completely eclipsed by heavy action in almost all other series.

1947-S--Still strong at \$27.75 bid and \$30.00 ask; low volume.

1954-P--Improved somewhat with bids at \$22.75; no offers, no volume.

1954-S--Getting stronger with bids at \$15.50, ask price \$16.00; low volume.

1955-S--Interest increasing in this roll with many strong bids for bag lots at \$31.50. Volume held low by reluctance to sell at this price. Most offers to sell being held at \$32.00 to \$33.50.

1958-P--Some action around the \$4.00 to \$4.05 range.

1960-Psm--Action in this roll has now slowed down to a walk since the Denver Convention. Most volume offers to buy at about \$250.00 and strong sell orders at \$260.00.

1960-Dsm--Made slight advance this week due to strong buyers at \$1100.00 per bag. Asking prices range from \$11.25 to \$11.75.

NICKELS.

Nickels as a whole are still in a sustained price spiral led by war nickels and followed closely by almost all scarce dates. War nickel sets are bid strong at \$780.00 with the only offers at \$830.00. BU roll sets are \$5400.00 bid and \$5700.00 ask.

1938-P--As we indicated before, this is a very scarce roll and does not seem to be available in quantity at any price. This roll is now bid at \$65.00 with no offers to sell. If one strong buyer should come into the market, the price on this roll could very easily pass the \$100.00 mark. Volume bought at \$65.00 was insignificant.

1938-S--This roll still advancing strongly with firm bids at \$375.00 and very few offers at any price.

1939-D--This king of the Jefferson roll set is finally making its move and is now bid strong at \$1750.00 with no offer to sell.

1942-Pt2--As a key of the war nickel set, this roll is making remarkable advances and is now bid strong at \$240.00; few offers to sell.

1942-S--Another remarkable advance of about 25% in one week; now bid at \$125.00. Scattered offers at \$130.00 and up.

1943-D--Slight advance in price, firming up more towards end of week, \$100.00 bid, \$112.50 ask, with some sales at the ask price. Volume low.

1944-P--Another fantastic price increase due to war nickel pressure. Strong bids and some sales at \$60.00, ask price \$65.00. Low volume.

1945-P--Also going up. Low volume at \$35.00 bid, \$40.00 ask.

1947-S--Renewed interest in this roll with strong bids at \$54.00 and no offers to sell.

CIRCULATED ROLLS ARE AVERAGE CIRCULATED
UNLESS SPECIFIED OTHERWISE.

PLEASE NOTE!

The prices in this Newsletter are wholesale prices, taken from dealer-to-dealer sales over national teletype services and other sources. From these prices, you may price your retail sales properly, replace your stock from the wholesale market, and realize a legitimate dealer profit.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

*An asterisk next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

A MONDAY MORNING REPORT ON THE WHOLESALE COIN MARKET AS IT CLOSED FRIDAY AFTERNOON

August 23, 1963

BULL MARKET CONTINUES IN ALL SERIES

Caveat Emptor . . . ?

An Editorial. The following is a direct quote from the floor of the Blue Ridge Convention.

"There has been much activity during the early afternoon set-up period with the boys in the know and those having advance information on their teletypes, buying up all the cherries on items where the average little dealer is not aware of the current price rises."

We are aware that there are some unscrupulous dealers who have been outspoken in their efforts to keep this advantage for the favored few and are now rubbing their hands in glee as they read of the above coup. The fact that this situation is not only viewed with humor, but actively supported by some dealers, is a disgrace to the Numismatic profession. Any dealer, in any business, who must work behind an iron curtain of secrecy in order to buy from the uninformed at half price and sell to the unwary at double price, has outlived his usefulness to both his profession and society. We suggest that any dealer who places himself into this category should move into horsetrading or some other business where sharp practices are the rule rather than the exception. The coin business is now growing up, and will no longer support those dealers who adhere to the creed of caveat emptor.

There are many new and marvelous techniques and methods being adopted by the coin industry, as happens in any growing business. We would like to point out to the innovators of these techniques, that if they wish to thrive and flourish with this industry, they must realize that they have certain responsibilities towards the industry; one of these responsibilities is to ascertain that their facilities are put to their best and highest use in the interests of the industry as a whole. This responsibility certainly cannot be fulfilled by conspiring with any group to further the monopolistic tendencies of this group, by suppressing information that is basic and necessary to the survival of any other group. The history of the industrial revolution of this country amply illustrates that in no case will the rights of the many be subjugated to the rights of the few.

BU ROLLS

CENTS.

Some of the heavy activity moved into the better cents this week with increased demand for many of the scarcer dates. Many strong bids, with resulting increase in price among the more common dates.

- 1942-S--First significant activity in several weeks. Moved up to \$170.00 bid, \$190.00 ask. Still low volume.
- 1944-S, 45-S, 46-S--All made good gains this week, moving from last week's \$13.50 bid to this week's \$15.25 bid with sell offers at \$17.00.
- 1947-S--Still moving up to \$28.50 bid, \$30.00 ask.
- 1948-D--This week's bid price of \$9.00 is over last week's asking price of \$8.50; low volume.
- 1949-P--Moving up with other cents; now \$25.00 bid, \$26.00 ask.
- 1952-D--Strong bids at \$3.50; few sell offers.
- 1953-D--Strong bid at \$3.00; no offers.
- 1954-S--Very heavy activity in this roll, with strong price advance to \$19.00 bid, few offers to sell. Good volume as it moved upward.
- 1955-S--This roll is really on the move again, with heavy buying pressure forcing prices up to \$35.00 bid with only scattered offers at \$36.00. Some sales as high as \$37.00 for choice rolls.
- 1957-P--Slight advance to \$4.00 bid; low volume.
- 1958-P--Moved up to \$4.20 bid, \$4.25 asked; fair volume.
- 1959-P--Still moving with fair volume at slightly increased price of \$1.25 bid and ask price firmer at \$1.35 to \$1.40.
- 1960-Psm--Now leveled off at \$255.00 to \$260.00; very small volume.
- 1960-Dsm--Still good activity with price edging up to \$11.75 bid, \$12.00 ask.

NICKELS.

Prices are still rising in most all scarce dates. Here again, many significant price advances are taking place in the higher mintage rolls in order to keep pace with the generally advancing market. War nickel sets \$800.00 bid, \$825.00 ask.

- 1938-P--Up another 10% this week at \$72.50 bid, \$75.00 ask; low volume.
- 1938-D--Shows signs of moving upward with bids earlier in the week at \$275.00; now \$270.00 bid, \$285.00 ask.
- 1942-P t1--Still moving up with bids at \$48.00, ask price \$50.00.
- 1942-P t2--Strong demand at \$260.00 bid, \$280.00 ask; fair volume.
- 1942-D--Strong buying pressure forcing this roll upward, with bids of \$535.00 producing few sales. Ask price \$635.00.
- 1943-D--Good activity this week, with prices up and down; week ending \$115.00 - \$120.00.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

*An asterisk next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of business as it actually stood at the closing of the teletype services on Friday afternoon at 5:30. Most prices on lower priced rolls are in bag lots.

PLEASE NOTE!

The prices in this Newsletter are wholesale prices, taken from dealer-to-dealer sales over national teletype services and other sources. From these prices, you may price your retail sales properly, replace your stock from the wholesale market, and realize a legitimate dealer profit.

Caveat Emptor

(Continued from Page 1)

In this country, there are many courses open to those seeking redress for a wrong. One of the most effective of these is going directly to the public through the many media available. A serious drawback to this course is that an attack on the integrity or moral responsibility of any dealer or organization connected with the coin business at this time could very seriously impair the confidence of the public in the coin business as a whole. This could be a very serious disservice to the industry, particularly in view of the fact that this thriving business is being built on a cornerstone of investment money, which in turn is only attracted by confidence and can be notoriously flighty in the face of controversy.

In the few short months since we started publication of the Coin Dealer Newsletter, we believe that we have established the most reliable and complete pricing reference available to any coin dealer anywhere. We are providing a service, gentlemen, and we will not be denied. We proudly number among our subscribers a large proportion of the largest and most reputable coin dealers in this and two other countries. In our files, we have signed letters of approval from many of these dealers, and, incidentally, we would welcome your letter if you have used our newsletter and found it of value.

May we respectfully suggest to interested parties that this is a good time for an honest examination of the moral issues involved, and also a counting of heads before surrendering your rights and obligations to the greedy and irresponsible.

BULL MARKET

(Continued from Page 1)

1944-P-D-S--All moving up with the silver nickel set.
1947-S--Took a strong jump to \$65.00 - \$67.50. Earlier bids as high as \$70.00.
1950-P--Demand for this nickel seems to be unlimited. Now bid at \$165.00, ask price \$170.00; good volume.
1950-D--Fairly steady demand at \$680.00 - \$685.00.
1951-S--Demand heavier; seems to be in short supply.
1960-P--Unusual activity here. Seems to be in demand in 10 to 50 bag lots.

DIMES.

Dimes are still very strong with demand still on the 1955-P-D-S group. BU roll sets at \$2250.00 bid, \$2350.00 ask, with sales at the ask price.

QUARTERS.

Quarters moving very well with heavy emphasis on the 1950-P and 1955-D.

HALVES.

1955-P still holds the spotlight with heavy activity; large volume.

PROOF SETS

Price increases in almost every instance, concentrated in the later dates.

1963--Unusual activity with bids at \$3.20 and some asking prices as high as \$3.75.

CIRCULATED ROLLS

Renewed activity in both cents and nickels.

The COIN DEALER teletype newsletter is published and air mailed weekly as a service to Coin Dealers by Clearmark Company, 14600 South Crenshaw Boulevard, Gardena, California. Data processing is analyzed and approved by Commercial Controls of California, an independent accounting firm. SMALL DATES ON THE MOVE AGAIN

BU ROLLS

CENTS.

Demand is still increasing for scarce date cents with price increases in both scarce and common dates.

- 1938-D--Increased demand for large lots at \$120.00 bid. No offers to sell.
1939-D--Much more activity with bids at \$220.00, asking price \$225.00.
1942-S--Increased interest at \$180.00 bid, \$190.00 ask.
1950-S--Strong price jump this week with only fair volume at \$25.00 bid, \$25.50 ask.
1953-D--Strong demand pushed bid price to \$3.50; no offers to sell.
1954-D--Another strong price increase with bids of \$5.00 producing no volume.
1954-S--Still moving ahead strongly at \$22.00 bid, \$22.50 ask; very good volume moving in bag lots at these prices.
1955-S--Strong demand moving prices up to \$37.00 bid, with scattered offers to sell at \$37.50 to \$40.00; good volume.
1960-Psm--On the move again with bids of \$270.00; few offers to sell; low volume.
1960-Dsm--Moving up very strong this week with bid prices at \$15.00 and bag lots moving at this price. Small lots of 20 rolls and less selling as high as \$15.75.

NICKELS.

The general price rise in nickels is still holding up and still concentrated to some extent on the War nickels. War nickel sets were bid as high as \$825.00 at one time during the week, with sales made at this price. There is a very noticeable trend this week toward heavier bidding on the later date BU Buffalo nickel rolls. This could indicate heavier investment buying in this area and if so, watch for a price rise in these rolls.

- 1938-P--Still moving upward with bids at \$80.00 and offers at \$80.00, both producing limited sales.

- 1938-D buff--Increased buying pressure moving this roll up with strong bids at \$73.50; few sell offers.
1946-S--Increased buying moved bid price up to \$55.00; low volume.
1948-S--Very heavy buying pressure forced price up to \$70.00 bid, with still low volume.
1950-P--Still moving up with heavy demand at \$176.00 bid, \$180.00 ask; fair volume.
1950-D--Still moving well at \$690.00 to \$700.00.
1955-P--Heavy action this week with bid price up to \$95.00 at one time, with good sales at this price. Week ended with price at \$87.50 bid, \$90.00 ask.
1955-D--Heavy action for two or three weeks on this roll has now forced price to \$8.50 bid, with some sales at this price.
1958-P--Moving up to \$25.00 bid, \$26.00 ask; good volume.
1960-P--Strong demand at \$3.00 bid; few offers to sell.

DIMES.

The popularity of dime rolls and dime roll sets is still increasing with heavy emphasis on the scarce dates, including the 1955 group.

- 1949-P--Buying pressure forcing prices up to \$290.00 bid, with very little response from sellers.
1949-S--Bid price still moving up at \$335.00; low volume.
1950-S--Also moving up with practically no response. \$280.00 bid.
1951-S--Another key roll moving up with the tide. \$285.00 bid.
1955-P--Moving up very fast; \$65.00 bid, \$70.00 ask; large volume.
1955-D--Also moving up very fast at \$50.00 bid, \$51.00 ask; good volume.
1955-S--Less action this week than last, but most offers at \$61.00 to \$62.00 being snapped up fast.

QUARTERS.

Quarters still quite active with interest centered in a few scarce dates.

- 1955-D--Most active of all the quarters with extremely heavy buying pressure still forcing prices upward. Now \$83.50 bid, \$85.00 ask, with bag lots being mentioned quite frequently.

HALVES.

- 1955-P--Still the most popular roll, and is probably being bought and sold more frequently than any other half dollar.

PROOF SETS

Most later date sets moving in large volume, with prices either holding steady or moving ahead slightly.

- 1960 sm--Took a tremendous jump in one week; \$50.50 bid, \$51.00 ask. Large volume at these and lower prices.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

DIMES TAKE THE SPOTLIGHT

BU ROLLS

CENTS

There is renewed activity in the 1934 to 1939 cents this week, also good activity in most better dates, especially small dates. Late dates seem to be growing in demand, in up to 100 bag lots; prices moving up.

1938-D--Heavy buying pressure for fair sized lots at \$127.50 bid; low volume.

1947-S--Bag lots bid at \$32.00, small offerings at \$32.50 and up; no volume.

1960-Dsm--Continues its fantastic climb, now bid very strong at \$17.50 for bag lots; ask \$17.50 and up.

1960-Psm--Increased interest and heavier buying pressure this week at \$275.00 bid, \$280.00 ask. Could continue to move upward. Toward end of week, there were insignificant offers to buy at \$280.00 and many offers to sell were held as high as \$300.00.

NICKELS

Nickels as a whole tended to level off this week, with very significant price increases in some rolls being counterbalanced by price trimmings in other areas. Price advances seem to center around later date rolls, while many war nickel rolls backed off slightly. Some war nickel sets offered at \$800.00, most at \$825.00, with few sales. Buffalo nickel rolls continued to gain strength.

1939-S--Stronger bids on this roll this week. Bid at \$625.00, ask \$635.00.

1942-P--Little action first of week, with rolls going at \$45.00. Gained strength toward end of week, ended strong at \$53.50 bid, \$55.00 ask.

1950-D--Showing increased strength toward end of week, with bids at one time at \$735.00. Ended week fairly strong at \$710.00 bid, \$725.00 ask; good volume.

1952-S--Strong bids at \$37.00. Seemed weaker toward end of week.

1955-D--Phenomenal price rise for one week of 100%. Strong bids for bag lots at \$1650.00 with best sell offers at \$1750.00.

DIMES

Major investment buying this week has shifted full swing into BU dime rolls. The entire Roosevelt series is feeling the impact of this swing and as a result, dime prices are all moving forward with few exceptions. BU roll sets of dimes are now bid very strong at \$2700.00, with no offers to sell under \$3000.00.

1946-S--Took a heavy swing upward this week with very strong buying pressure at \$42.00 bid, with hardly any offers to sell; no volume.

1948-D--This roll was bid high at \$30.00 at one time during the week.

1949-P--Still moving upward at \$300.00 bid, \$325.00 to \$335.00 ask.

1949-S--This roll took a tremendous jump to \$400.00 bid and no offers to sell.

1950-S--Moving up to \$290.00 bid, no sell offers.

1951-S--Very strong bids at \$310.00; no sell offers.

1952-S--Improved action this week with bids at \$105.00 and sales at \$115.00 ask.

1953-P--This roll seems to be very scarce also, with strong bids up to \$25.00 producing no sales.

1955-D--Moving ahead well with heavy sales at \$54.00 bid. Most ask prices at \$55.00 or over.

1956-P--Moved up to \$7.00 bid. Few offers; low volume.

1958-P--Very much in demand at \$23.00 bid. Volume offers at \$23.50.

1951-P--Good volume at \$10.00 both bid and ask at various times during the week.

QUARTERS AND HALVES

Better date quarters and halves still being traded strongly with few important price changes.

PROOF SETS

Bid prices on earlier date proof sets advanced so fast this week that ask prices have not had time to catch up. Prices up on most later dates also.

1960sm--Tremendous action on this proof set drove prices up to \$54.00 bid and \$55.00 ask. Large volume at \$52.00 to \$54.00.

CIRCULATED ROLLS

DIMES--Heavy buying pressure in circulated dimes reflects the price rise in BU rolls. Pressure was heaviest in the 1955-P-D-S group.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

FOR SALE: BU rolls.

EACH WEEK, WE RECEIVE MANY LETTERS FROM OUR READERS ASKING THIS QUESTION: SINCE WE DO NOT HAVE A TELETYPE, HOW DO WE BUY OR SELL AT THESE PRICES?

WE NOW HAVE THE ANSWER TO THIS QUESTION. Starting next week, this page will be devoted to the DEALER'S MARKET PLACE, in order to provide you, the dealer with an opportunity to buy and sell to each other. Your message will reach over 1,000 other dealers, and we estimate a readership of over 5,000 people who are directly connected with the buying and selling of BU rolls as a business.

This provides you with fast, up-to-the-minute communication with a highly selective audience of the very people with whom you want to do business.

12:00 o'clock, noon on Friday, August 13th, is the deadline for the August 13th issue. Your message will be on the desk of 1,000 other dealers on the following Monday morning.

BU ROLLS

CENTS.

Most of the action in cents this week was in early dates (1934-1937) and in the late dates (1955-1960).

- 1954-P--Heavy bids for bag lots at \$25.50. Most sales at bids of \$26.00; \$28.00 ask.
1955-P--Good price rise to \$6.50 bid, \$6.75 ask, with volume bids at this price; low volume.
1955-D--Heavy bidding at \$6.00; low volume.
1957-D--Heavy bidding at \$1.60 almost doubled the price on this roll.
1958-P--Increased action this week with heavy bids at \$4.55, asking price now \$5.00.
1958-D--Heavy bids at \$1.70, almost double last week's asking price of \$.90.
1959-P--Strong bids at \$1.75; low volume.
1960-P--Strong bids at \$1.10, with bids up to \$1.20 for mint-sewn bags; low volume.
1960-Dsm--Heavy trading in this roll at \$22.00, bids up to \$23.00 at one time. At end of week, sales being made at \$21.50 to \$22.50.

NICKELS.

Bidding in nickels was extremely heavy this week throughout the entire series. War nickel sets were up to \$900.00 bid, \$1,000.00 ask, and late date nickels made an extremely strong advance.

- 1938-Dbuff--Strong bids drove bids up to \$82.50 with very light sales.
1941-S--Heavy bids at \$57.50.
1942-P t1--Week ended with bids for large quantities at \$75.00. Good volume earlier at slightly lower prices.

1942-P t2--Bid prices up to \$315.00 with some asking prices held high as \$400.00.

1946-S--Increased buying pressure at \$65.00 bid, \$70.00 ask; light volume.

1949-S--Heavy bids at \$130.00; low volume.

1955-P--Bid price jump to \$125.00 bid and ask prices at \$135.00 to \$145.00; fair volume.

1957-P--Extremely heavy action on this roll forced bids up to \$18.00 at one time. Ended week at \$15.00 ask.

1956-1959-D mints--Heavy action in all these D mints, with good price rises all along the line.

1960-P--Seems to be the star performer this week, with extremely strong bids up to \$3.75 in large lots of 10 to 100 bags.

DIMES.

Dimes gave up the spotlight this week to cents and nickels, but are still moving along nicely with roll sets now bid at \$3,000.00.

1946-S--Still moving up to \$46.00 bid, \$47.00 ask; very low volume.

1955-D--Bid price up to \$55.50 at one time; now back down to last week's \$54.00.

1955-S--Late week bidding moved this roll up to \$65.00 bid, \$66.00 ask; fair volume for the week.

QUARTERS AND HALVES.

Good volume this week at or near prevailing prices with few startling developments.

1958-P quarter--Now up to \$27.00 bid, \$28.00 ask.

1953-P half--Good price advance to \$55.00 bid.

PROOF SETS

Action in proof sets seems to have settled down a little this week with some price advances in the early fifties.

CIRCULATED ROLLS

Some heavy advances in late date cents and in most of the better date nickel rolls. 1955-P dimes also saw some action.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

GARDENA, CALIFORNIA

The DEALER'S MARKET PLACE provides you, the dealers, with an opportunity to buy and sell to each other. Your message will reach over 1,000 other dealers, and we estimate a readership of over 5,000 people who are directly connected with the buying and selling of BU rolls as a business. This provides you with fast, up-to-the-minute communications with a highly selective audience of the very people with whom you want to do business. 12:00 o'clock, noon Friday, date of publication, is the deadline for ads in the Dealer's Market Place. Your message will be on the desk of 1,000 other dealers on the following Monday morning.

PHILADELPHIA SMALL DATES STILL CLIMBING

BU ROLLS

CENTS.

Most action in cents this week was concentrated in late dates, including the small dates.

- 1947-S--Solid bids for bag lots at \$37.00 and \$38.00.
1948-S--Seems to be coming alive at last with good bids at \$35.00; not much volume.
1955-S--Still moving up with some small lots bid at \$40.50. Volume moving at \$40.00 to \$41.50.
1956-D--Moving up with other late dates; now \$2.30 bid, \$2.65 ask.
1958-P--Still strong demand; bid \$4.75 for bag lots, ask \$5.10.
1959-P--Bag lots bid strong at \$2.30; sales at this figure.
1960-Psm--Very strong demand for this key roll is forcing price up daily. Bid at \$360.00. Some bag lots offered at \$350.00 early in the week were sold fast. Many people feel this roll will reach \$500.00 before January.
1960-Dsm--Heavy trading in this roll this week with prices off slightly to \$20.00 bid, \$21.50 ask.

NICKELS.

Lots of action in the Jefferson series this week with strong price rises in many instances. Some roll sets offered as high as \$7500.00. War nickel sets still going up. Trading getting heavier in late Buffalo rolls.

- 1938-P--Strong buying pressure pushed this roll up to \$90.00 bid, \$95.00 ask.

- 1938-D Buff--Another stiff price hike this week to \$90.00 bid, \$95.00 ask.
1939-D--This blue chip roll still moving up at \$2000.00 bid, \$2200.00 ask.
1942-Ptl--This roll has now doubled in price in about one month. Now \$80.00 bid, \$92.00 ask.
1944-S--This scarce war nickel moving well. Now \$80.00 bid, few offers to sell.
1951-P--Seems to be in demand now at \$50.00 bid, \$60.00 ask.
1952-S--Price on this roll going up. Now bid at \$50.00 strong.
1954-D--Moving up fast with a price increase of over 30% this week. Now at \$12.00 bid, \$13.00 ask.
1955-D--This amazing roll has now moved from \$5.50 bid to \$21.50 bid in less than 60 days.
1956-D--Moving up fast with the other late date rolls. Now \$10.00 bid, \$14.50 ask.
1958-D--This nickel seems increasingly hard to buy. Heavy bidding now at \$3.40, few sell offers.

DIMES.

The dime market is rather peaceful this week with few notable developments. Roll sets still moving up strong.

- 1949-P--Good price rise to \$350.00 bid, no offers.
1950-S--Very strong price advance to \$400.00 bid; no sales, no offers to sell.
1955-P--This workhorse of the 1955 dime group is still forging ahead at \$70.00 bid.
1961-P--This roll seems very scarce and buying pressure is increasing. \$13.00 bid, \$15.00 ask.

QUARTERS AND HALVES.

Only a few price changes of interest in quarters and halves this week. 1955-D quarter still in great demand; now bid at \$97.50, no offers to sell.

- 1949-P Halves--Made a strong move to \$250.00 bid.
1955-P Halves--Still moving up at \$38.50 bid, \$40.00 ask.

PROOF SETS

Proof sets were very quiet this week with many good sized lots being moved in the later dates with few price increases of note. 1961 sets in demand.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

WAR NICKEL SETS PASS \$1000 MARK

BU ROLLS

CENTS.

Many early date (1934-1938) cent rolls continued to advance this week. Most emphasis still being placed on the late date rolls with D mints coming in for a share of attention.

- 1947-S--Very strong bids for bag lots at \$39.00; few sales.
1954-D--Strong buying pressure on this roll at \$6.50 bid; no sales.
1955-D--Strong bids at \$6.75; few sales. Small offerings at \$6.85.
1955-S--Eased up slightly this week to \$38.50 bid, \$39.00 ask; fairly low volume.
1960-Psm--This roll still moving up rapidly with fair volume at \$375.00 bid, \$385.00 ask. Closed at \$390.00 bid, \$40.00 ask, with sales at both prices.
1960-Dsm--Good demand and good volume with price still easing off a little. \$20.00 bid, 20.50 ask, with scattered offerings slightly lower.

NICKELS.

Buffalo nickels still strong. War nickels still moving up. Lots of activity in late date rolls.

- 1942-P t2--Still in great demand at \$345.00 bid; ask price at \$345.00 up.
1950-D--Moving well with latest bid at \$745.00, ask prices at \$750.00 to \$800.00 with majority in the higher range.
1955-P--Activity down slightly at \$120.00 bid, \$127.50 ask.
1955-D--Strong bag lot bids at \$23.00 with small lots being offered in response to this bid.

1958-P--Lots of activity in this roll, ending at \$28.00 bid, \$29.00 ask.

1959-P--Good volume with few significant price changes.

DIMES.

Good activity in dimes as usual with most scarce dates still advancing strongly.

- 1948-P--Bids at \$175.00 at one time; closed at \$165.00 bid with no sell offers.
1949-S--Bid at \$480.00, only sell offer at \$600.00; no volume.
1951-S--Bids now up to \$390.00, still no sell offers.
1952-S--Tremendous jump to \$185.00 bid, \$200.00 ask; no volume.
1955-D--Bag lot sold at \$60.00; most transactions at lower prices.
1961-P--Very much in demand; now bid at \$15.00, \$16.00 ask.

QUARTERS.

Most activity in quarters centered around the 1955-P-D and the 1958-D.

1955-D--Still advancing strongly; now at \$110.00 bid and ask.

HALVES.

Strong price advances in all 1948 - 1951 rolls; few sales at the new prices.

PROOF SETS

Price advances in early sets resulting in few sales. Very quiet market.

- 1950-- Many offers to sell at \$120.00. Buyers scarce.
1960sm--Price off slightly again this week due to absence of strong buyers. Offers to sell at \$49.00 at one time during the week. Ended \$48.50 bid, \$49.50 ask.
1963--Price jump due to one strong buyer. Bid \$2.90 for 200 sets. Ask \$3.00.

CIRCULATED ROLLS

Nickels were in the spotlight mostly this week with fairly heavy activity in most better rolls.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

NICKELS MAINTAIN LEAD IN BULL MARKET

BU ROLLS

CENTS.

Cents were mostly quiet this week with the exception of late dates which saw much heavy trading in the one to ten bag lots.

1941-D--Large price advance due to some solid bids by volume buyers. Closed at \$65.00 bid with no offers to sell; low volume.

1947-S--Heavy bids for bag lots forced this roll up slightly. \$41.00 bid, few sell offers; low volume.

1954-P--Good volume in this roll this week with bag lots going at \$28.00. Closed at \$29.00 with some sales at this figure.

1957-D--Moved up to \$1.80 bid, \$1.90 ask.

1958-P--Still moving up with good sales at \$5.25. Closed at \$5.50 bid; few offers to sell.

1959-D--Heavy bidding for up to five and ten bag lots moved this roll up to \$1.15 bid, \$1.25 ask.

1960-P--Heavy volume with five and ten bag lots moving at \$127.50 to \$135.00 per bag.

1960-Psm--This fabulous roll still marching forward to \$400.00 bid, \$420.00 ask; fair volume.

1960-Dsm--Very large volume in this roll all week at about the same prices. If demand remains at this level, this roll is sure to resume its upward climb.

NICKELS.

BU nickel rolls continued to lead the field this week in price advances.

1939-P--Large advance due to heavy bidding by large buyers. Closed at \$60.00 bid; no offers. Low volume.

1940-D--Solid bids forced this roll up to \$32.50 bid with few offers to sell.

1942-P t2--Small price advance while maintaining good volume. \$350.00 bid, \$365.00 ask.

1943-S--Took a big jump in price due to heavy bids by volume buyer. \$50.00 bid with some sales at this price.

1945-P--Extremely strong price advance to \$70.00 bid with solid bids at this figure. \$71.00 ask. Low volume.

1948-D--Extremely heavy bids moved this roll up to \$48.00 bid; no offers.

1950-D--Seems to be in heavy demand regardless of price. Moved up to \$775.00 bid, \$800.00 ask; normal volume.

1955-P--Seems to be leveling out at around \$119.00 bid, \$120.00 ask; fair volume.

1955-D--Eased off slightly this week to \$21.50 bid, \$23.00 ask; still good volume.

DIMES.

Very heavy bidding this week, but at prevailing prices to a large extent.

1947-S--Good price rise to \$35.00 bid, few sales.

1948-P--Good price advance to \$209.00 bid, no offers, low volume.

1953-P--Up at \$41.00 bid, \$45.00 ask.

1954-P & D--Heavy buying pressure at prevailing prices.

1961-P--Still in demand at \$16.00 bid, \$16.50 ask.

QUARTERS.

1950-S--Heavy bids forced this roll up to \$70.00 bid, no offers to sell.

1955-D--Slight price rise to \$115.00 bid, \$120.00 ask, with very good volume.

HALVES.

1952-P--Heavy bids this week at \$20.00 produced few sales.

PROOF SETS

Action very quiet in proof sets with many large volume offerings at prevailing prices not affecting a large volume of sales.

1960-Psm--Firmed up this week at \$50.00 bid, \$52.00 ask; fair volume at these prices.

TONGA COIN STAMP

Rumor has it that there is information direct from Australia to the effect that the 15 shilling black has a mintage of only 18,772. With the plates destroyed, this could become a rarity.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

The DEALER'S MARKET PLACE provides you, the dealers, with an opportunity to buy and sell to each other. Your message will reach over 1,100 other dealers, and we estimate a readership of over 5,000 people who are directly connected with the buying and selling of BU rolls as a business. This provides you with fast, up-to-the-minute communications with a highly selective audience of the very people with whom you want to do business. 12:00 o'clock, noon Friday, date of publication, is the deadline for ads in the Dealer's Market Place. Your message will be on the desk of 1,100 other dealers on the following Monday morning.

HIGHER PRICED ROLLS MEET BUYING RESISTANCE

A very noticeable trend appears to be developing in the entire BU roll and proof set market this week. This trend shows a tendency for the fast-rising rolls to pause in their upward flight and remain static for at least a short period of time. This is a healthy situation indeed, since it allows the market time to assimilate the new prices and take a breather, while other less popular rolls close the price gap somewhat.

This has been the normal price pattern for years and is definitely good for the stability of the market as a whole. We believe that the fast communication between all the segments of the market, made possible by the various teletype systems, will eventually allow all rolls and proof sets to assume their natural price relationships to each other. Then the market as a whole will move forward in an orderly fashion, constantly fed and enlarged by the increasing collector and investor population.

NEW WEST COAST TELETYPE SYSTEM

The Publishers of the Coin Dealer Newsletter are pleased to announce the formation of a new teletype coin exchange, dedicated--as is the Newsletter--to the dissemination of information and services to the smaller as well as the larger coin dealer. The schedule of rates (as low as \$50.00 per month) is such that all coin dealers, regardless of size, can avail themselves of a complete teletype service. At the present time, the service is limited to the west coast; however we feel that it will be extended to other areas very shortly. The new company is the Pacific Coast Teletype Corp., and will be known as the P.C.T. Coin Exchange. There are presently 42 members in the Southern California area, and the exchange is growing at the rate of three per day. Your inquiries are invited.

CENTS.

- 1943-D--This roll seems hard to get, with spirited bidding. Closed at \$17.00 bid, \$19.00 ask.
- 1946-D--Another low-priced roll moving up to \$8.00 bid, \$9.00 ask.
- 1950-S--Improved at \$25.00 bid, \$30.00 ask.
- 1951-S--Much more buying pressure on this roll. \$44.00 bid, \$47.00 ask.
- 1955-P-D--Both these rolls traded well with bag lots moving at around \$7.00.
- 1955-S--Eased up this week with emphasis on sell offers. Several bag lots offered at \$38.00 to \$39.00, with no takers. Closed at \$30.00 bid, \$38.00 asked.
- 1959-D--Heavy buying pressure in large bag lots. Highest bid at \$1.32 with bids at \$1.20 for almost unlimited amounts.
- 1960-Psm--More sell than buy offers this week, with prices slightly lower than last week.
- 1960-Dsm--Lower volume with sell offers in the majority. Large buy orders at about \$18.50.
- 1963-P--Buying interest. Closed up, at \$.58.

NICKELS.

- 1938-D--Strong bidding moved this roll up to \$335.00 bid, \$365.00 ask.
- 1943-D--Good volume at prevailing prices.
- 1946-D--Following the trend of other lower-priced, older rolls to move upward. Closed at \$18.00 bid, \$21.00 ask.
- 1947-P--Moved up well following same trend. Closed at \$16.75 bid, \$18.50 ask.
- 1947-D--Strong move to \$29.50 bid, \$33.00 ask.
- 1948-P--Moved up with other low priced rolls. \$14.00 bid, \$18.00 ask.
- 1949-P--Sales at new high of \$35.00 bid, \$38.00 ask.
- 1950-D--More sell than buy offers. Slight price drop to \$750.00 bid, \$765.00 ask; low volume.
- 1951-D--Moving up with other P and D rolls with sales at \$72.50.
- 1951-S--Seems finally coming into its own at \$205.00 bid, \$215.00 ask.
- 1952-P--Tremendous price jump for this roll with sales at \$25.00 and \$26.00.
- 1956-D--Moved up well with sales at \$11.00 bid.
- 1961-P & D--Heavy bidding in most late-date rolls moved these rolls up very fast. Closed at \$2.90 and \$2.70 respectively.

DIMES.

Much the same situation prevailed in dimes as in the other series this week, with rolls that have been moving well, standing still, while other rolls catch up with the price spiral.

- 1947-P-D-S--All made large price advances.
- 1950-S--Sales at \$500.00 bid.
- 1955-P-D-S--much selling pressure concentrated in this series, with the 1955-S suffering most.

QUARTERS & HALVES.

- 1949-P Halves--Heavy buying pressure with sales at \$425.00 bid.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

MARKET STEADIES AFTER WILD WEEK

The market as a whole has been very erratic, with a wide fluctuation of prices during the early part of the week. As of today, things have settled down and appear fairly steady. Poorest performance for the week was turned in by the 1955 dime series.

PACIFIC COAST TELETYPE REVEALS EXPANSION PLANS

P.C.T. Coin Exchange announces that they are now accepting applications from Bay Area coin dealers and are extending their system to include San Francisco and surrounding areas. San Diego dealer applications will start being processed next week, giving this new teletype coin exchange full West Coast coverage.

The next targets for this new low-cost teletype system are New York and Chicago, and present plans are to incorporate these three systems into a national hook-up. Inquiries are invited from dealers in any of these areas.

NEW 'PROFIT MARCH' BOOK SET FOR JANUARY RELEASE

Payne Publishing Co., Inc., publishers of the Coin Dealer Newsletter, announce the forthcoming publication of a new "Profit March" book by George W. Haylings. This book will be investment-oriented and should prove a valuable asset to both investors and dealers. Copies are scheduled to be off the presses in the middle of January, 1964. Dealer and distributor inquiries are invited.

CENTS.

1955-P & D--Both bid strong at \$7.00 and over earlier. Closed slightly lower.
1955-S--Still easing off. Little buying interest. Closed at \$36.00 bid, \$36.50 to \$37.00 ask.
1959-P--Heavy buying pressure with bids at \$240.00 and light sales.
1960-Psm--Lots of action this week at \$385.00 bid, \$390.00 ask; sales at both prices.
1960-Dsm--Seems to have leveled off at around \$19.00 with light sales.
1963-P--Now up to \$55.00 bid on bag lots and low sales for this cheapie.

NICKELS.

Late dates up and down; 1957-D leading the field, with offers to sell as low as \$3.90 and bids high as \$7.50. Leveled off at \$5.50, strong sales at this price. The 1960-P is another leader in the field, with heavy buying offers at \$4.60 and ask of \$5.00. 0. Where are they?

DIMES.

Lots of action on 1954-P & D; all offered at \$10.00 to \$10.50 were immediately bought.

1955-P--Strong
1955-D & S--Easing off.
1960-P--Still rising with bids of \$8.00 in large lots and asks of \$9.00.

QUARTERS.

1958-P--This 7 million mintage coin is the leader in its field with heavy buy offers at \$35.50; good volume.

HALVES.

Fairly steady for the week.

SILVER DOLLARS.

Real fluctuation on these; Keys up, cheapies down.

PROOF SETS.

Very little action this week; prices fairly stable.

CIRCULATED ROLLS.

Nickels going up. 1938-P at \$6.00 bid; very light sales. 1939-D on the move at \$220.00 bid, \$240.00 ask. 1943-D moving up, with bids to \$18.75; low sales.

1955-P dimes bid at \$31.00, and only a scattering of rolls sold at this price.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

The DEALER'S MARKET PLACE provides you, the dealers, with an opportunity to buy and sell to each other. Your message will reach over 1400 other dealers, and we estimate a readership of over 5,000 people who are directly connected with the buying and selling of BU rolls as a business. This provides you with fast, up-to-the-minute communications with a highly selective audience of the very people with whom you want to do business. 12:00 o'clock, noon Friday, date of publication, is the deadline for ads in the Dealer's Market Place. Your message will be on the desk of 1,100 other dealers on the following Monday morning.

HEAVY DEMAND FOR CIRCULATED ROLLS

BU ROLLS

CENTS.

Most late date cents traded very heavy this week with D mints leading the way.

1955-D--Took the lead this week with heavy bids at \$800.00 per bag and very few offers to sell.

1959-P--Heavy buying pressure at \$240.00 to \$250.00 per bag.

1959-D--Went to \$1.35 bid; medium sales.

1960-D--Heavy buying at \$115.00 per bag on this sleeper.

NICKELS.

1956-D--Had large bag bids at \$1050.00 per bag.

1958-D--Heavy buying pressure at \$3.90 bid, few sales.

1960-P--Still very elusive, with only a few sales at \$500-510.00 per bag and bids of \$475.00 in large lots. Where are they?

DIMES.

1946-D--Heavy buying pressure up to \$19.50 per roll with almost no sales.

1960-P--Still scarce with one bag ask at \$1250.00 and sold immediately. What happened?

QUARTERS.

1946-S--Lots of action, with bids to \$85.00; few sales.

1955-D--Steadied at \$122.50 bid and good action.

1958-P--Still elusive and almost no sales. Some bids at \$37.00 to \$38.00 a roll and very few sales.

SILVER DOLLARS.

Silver dollars are very active, with the CC mints going up steadily. The 1894-P is still the toughie in its field.

PROOF SETS

Very slow, with large lots offered for sale.

CIRCULATED ROLLS

Circulated rolls make news this week with heavy activity in nickels and dimes.

Cents. 1954-S cents are bid at \$182.00 per bag and few sales.

Nickels. 1942-D--Jumped to \$13.00 bid and very light sales.

1943-D--Went to a strong \$19.00 bid and very light volume.

1950-P--Up slightly to \$14.00 bid.

1950-D--Still steady at \$625.00 bid, some at \$530.00.

1952-3-4-S--Rising rapidly due to heavy investment buying. Bringing \$3.50 to \$4.00 per roll with offers to buy in bag lots.

Dimes. 1955-P--Bid at \$35.00 a roll and hard to buy.

1955-D & S--Going up, up, up.

1949-S--Has risen from \$14.00 ASK to \$25.00 BID in one week, and only a scattering of rolls.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

DEMAND INCREASING FOR CIRC. DIMES

Last week, the price given on 1955-S circ. dimes was in error. This should have read \$15.00 bid instead of \$25.00 as reported.

The big news this week is still the extremely heavy action in circulated dimes. We have added several circ. dime rolls to the list this week because of the heavy demand for the cheaper, late date S mint rolls. Some of these circ dime rolls were bid for the first time this week. ASK prices on these rolls have been ignored this week because most of them were as high as twice the bid price.

This new interest in circ. dimes is sure to have an effect on unc. dime prices, and this is already in evidence in many instances.

THE MARKET IN DEPTH

by JAMES G. MILADIN

With many collectors, dealers and investors anticipating a selloff, the coin market has entered into its second week of consolidation. Prices in general have steadied, with the more solid rolls edging higher, and some profit-taking in the so-called speculative issues.

Within the unc. cents, there is a small degree of softness being shown among the 1954-S, 1955-S and 1960-D sm date. From 1955 on there is a strong demand for rolls and bags.

The Jefferson nickels in both circ. and unc. are strong and steady, with prices inching upwards, although in my opinion, which is shared by many, the 1955-D seems to be overpriced. Recommend you transfer your holdings in this date to 1946-P, 1947-P or 1948-P. Also recommend buying the 1939-D circ., as this coin is in for a big swing upwards.

Many thought the Roosevelt dimes were in for a selloff, especially the 1955-PDS series. During the past week, this failed to materialize, as the three rolls in circulated were being offered at close to the \$90.00 mark, with the demand being greater than the supply; thus forcing the unc. price upwards again. As the circ. prices on this series, including the 1949-S, are spiraling upwards, would recommend buying the circ. 1955-P and unc. 1955-PDS. The entire Roosevelt series is acting very well, excepting the 1900-P and 1961-P, which are showing a small degree of weakness. This is to be expected after their spectacular rise.

Both quarters and halves are inching upwards, especially the 1955 series. In the quarters, there are many buyers with very few sellers. Such is also true in the Franklin halves. In my opinion this half dollar series is in for a big move, and there is money to be made in it. The 1953-S, 1954-S and 1956-P seem to be underpriced, and would recommend them for a solid investment.

The dollars are still moving upwards, although the 1899 was offered at \$400.00 per roll. Any dollar with a mintage of under 800,000 is in the solid category, especially the Carson City series.

BU ROLLS

CENTS.

1934 - 1951 mostly steady, with fair demand.

1955-D--Active this week at \$8.00. One offer to buy two bags at \$9.00 earlier.

1958-P--This last of the old cent series still moving up.

1959-P--Lots of action on this first memorial cent, with heavy buying pressure at \$265.00 per bag.

1959-D--Heavy buying pressure at \$1.43 BID, \$1.47 ASK.

1960-P--Tremendous action, with bids at \$1.40, \$1.50 ASK.

1960-Dsm--Still sleeping; watch this one.

1961-D--A real mystery. \$.93 BID, \$1.05 ASK.

1963-P--Bid demand at \$65.00 per bag plus freight, which means a cost of about \$75.00 per bag.

NICKELS.

1940-D--Heavy buying pressure, with bids to \$40.00.

1941-D--Active with bids to \$37.00.

1948-D--Where are these rolls? Moved to \$60.00 BID, with very light sales.

1949-D--This one really moved up from \$38.00 to \$60.00 BID in one week.

1955-D--Heavy action earlier in the week, with bids as high as \$29.00 to \$30.00. Closed at end of week at \$23.75 ASK.

1957-P--Hard to buy, with bids at \$11.50 to \$12.00.

1958-P--Moved up to \$30.00.

1959-P--Beginning to show some action. Bids still at \$12.00.

1960-P--Strong bids at \$500.00 for bag lots, with few offers to sell.

DIMES.

1946-P & D--There seems to be plenty of money behind the people who are buying these up.

1953-P--Watch this one. Bids up to \$67.50 from \$57.50 last week.

1954-P & D--These are being bought at an accelerated rate.

1959-P--Lots of pressure on this one. Watch it.

QUARTERS.

1955-D--Interest reviving. Closed at \$132.00 BID.

1958-P--Still moving at \$40.00 BID, \$42.50 ASK. Low volume.

HALVES.

1953 still moving up with bids to \$65.00.

SILVER DOLLARS.

Better dates going up, higher mintages easing off.

LEGEND TO CHARTS

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

All prices are as of the close of business on Friday afternoon.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

PLEASE NOTE:

The prices in this newsletter are wholesale prices, taken from national dealer-to-dealer sales, compiled from all available sources. This information provides the dealer with a standard pricing reference that enables him to maintain his retail prices at a level which is properly related to his wholesale replacement cost.

THE MARKET IN DEPTH
(Continued from page 1)

Only the proof sets are at a standstill, excluding the 1963 which is still in demand. One cannot tell by their actions what they will do. Possibly this coming week, we will find an answer.

EDITOR'S NOTE: The opinions expressed in this column are not necessarily the opinions of the editors of CDN. We do feel that we have been very fortunate to secure the services of Mr. Miladin. Jim is well known and highly respected throughout the numismatic fraternity. He has been closely associated with coins for over 30 years, first as collector, then dealer, and then investor. An ANA member of 23 years standing, he holds the very respectable number of 9611. We are confident that both investors and dealers will benefit from his in-depth analysis of this week's coin market.

DEMAND INCREASING . . .
(Continued from page 1)PROOF SETS.

Proof sets still slow this week with the exception of 1963. These are extremely active, with bids to \$3.40.

CIRCULATED ROLLS.

Very steady with light sales and no large lots offered.

1939-D--Heavy buying pressure with bids to \$220.00. Some asking prices held high as \$275.00.

Dimes. All S mint circ dimes are moving up, up, and up. Very few sales.

1949-S--Moved from \$21.00 BID last week to \$32.50 BID this week. Heavy buying pressure.

1955-P--Up at \$39.50 BID this week and no sales volume.

1955-D--Moving up at \$18.00 BID; low volume.

1955-S--Also moved up to \$18.00 BID from \$15.00 last week; low volume.

BU MARKET STEADIES GENERALLY SILVER DOLLARS, CIRC. DIMES CLIMB

CENTS.

1934-1951--Prices holding mostly steady; average sales.
1952-S--Rose sharply to \$26.50 BID from last week's \$22.00 ASK.
1958-P--Steady at \$5.50 BID, \$5.75 ASK.
1959-P--Becoming harder to buy with heavy volume at \$2.60 to \$2.75.
1960-P--Good volume with bids to \$155.00 per bag at one time.
1960-Psm--Still easing off with good volume at \$370.00 to \$375.00.
1960-Dsm--Volume improving; should move.
1963-P--Good demand with bids to \$70.00 per bag plus freight. Some sales at \$65.00.

THE MARKET IN DEPTH

by JAMES G. MILADIN

After a hectic beginning which featured Roosevelt dime rolls being traded heavily, the week closed with very few exceptions on a steady tone. Prices in general fluctuated in the narrowest range, closing at approximately the same levels as the previous week.

There seemed to be a little more action in the circulated semi-key Lincoln cents, and don't be surprised if this long-dormant series awakens before long. Among the uncirculated Lincolns, there was the customary heavy trading from 1955 on. Offerings of the 1960-P small date seemed to increase during the latter part of the week at a slightly lower figure. Don't sell this "blue chip" short.

In the Jefferson nickels, trading seemed to predominate in the cheaper uncirculated rolls. Very few of the key rolls changed hands. The circulated rolls seem to have steadied, and the upward surge is temporarily stalled. In all, the Jeffersons won't get softer, and prices could resume their upward move with only a slight buying market in the circulated rolls.

The Roosevelts kept on being traded during the entire week, with no signs of softening. New buying strength seemed to show in the one. 46-S Friday, and it's possible the later dates will share its upward swing. It all depends on how high the circulated rolls follow through on their initial orbit.

Uncirculated Washington quarters are steady and solid, with many rolls in demand. There are many rolls in this series that are behind the market in relationship to the 1955-D. Check your trade publications of 1961-1962. My personal "pct" is the 1946-S, which was offered at 50% over the 1955-D. I'm sure you will find others.

While being sparsely traded, prices on the Franklin half dollars, sets and rolls, are very firm. Popularity in this series is gradually increasing, and dealer supplies are low. In relationship to its face value, there is only one way this series can go.

Among the heavily traded issues, the dollars were in the picture all the way. Those that were caught in the "O" debacle of a year ago are seeing a ray of hope. I again emphasize that mintages of 800,000 and under are gilt-edge investments in your one-roll "portfolios".

Proof sets increased in trading activity, presumably with dealers laying in their stocks for the Christmas traffic. Prices seem to be holding and edging upward in the 1950 to 1960 category.

Now, off to Santa Barbara to catch the final days of the State Convention.

NICKELS.

Silver nickels still soft with light sales.
1948-D--Still sleeping.
1949-D--Firm at \$60.00, with good volume.
1955-D--Moving again.
1956-P--Dropped slightly to \$11.50 ASK. Seems a good buy with 35 million mintage.
1956-D, 57-D, 58-D--Large lots offered at low prices, with few buyers.
1957-P--Moved up to \$13.00 BID from \$11.50 BID; good volume.

DIMES.

Mostly moving up due to pressure from circulated roll prices.
1946-P & D--Heavy bidding at \$17.00 to \$18.00; light volume.
1947-P--Moved up from \$83.00 to \$90.00 BID.
1955-P--Very strong with bids at \$78.00. Some ask prices being held as high as \$100.00.
1955-D--Still a little slow, with some sales at \$60.00.
1955-S--Still sleeping.

QUARTERS.

1953-S--Moved up to \$32.00 BID from \$26.00 last week.
1955-D--Price steady; good volume.
1958-P--Still moving with sales at \$41.00 to \$43.00.

HALVES.

1955-P--Moved up to \$50.00 BID from \$43.00 last week; low volume.

DOLLARS.

Better dates still moving up, mostly the CC mints. Some price increases as much as \$150.00 per roll.

CIRCULATED ROLLS.

Nickels. 1939-D--Moving well with strong bids at \$225.00; low volume. Ask prices mostly held at \$240.00 to \$280.00

Dimes. Circulated dimes still extremely active this week, with prices going up strong in most cases. All S mints up-up-up.
1950-S--Strong rise to \$13.50 BID from \$11.50 last week. Good volume.
1951-S--Moved up strong to \$14.00 BID from \$10.00.
1955-P--Holding firm at \$39.00 to \$40.00.

TONGA GOLD COIN STAMPS

SPECIAL NOTE: These sets are now being bid at \$15.00, with sales at this figure. Current ASK price: \$17.50.

VOL. VI No. 2 November 8, 1963
Published weekly

Editor ORVIL L. PAYNE

The COIN DEALER Newsletter is published by Payne Publishing Co., Inc., a subsidiary of Clearmark Corporation.

Home Office: 14600 South Crenshaw Boulevard
Gardena, California

The Coin Dealer Newsletter reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER Newsletter

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Decimal point in Mintage figures designates millions.

Investment Review

A review of the October 28th issue---
EMPIRE INVESTORS REPORT.

We are constantly searching the numismatic field for investment opportunities which might closely parallel those which were available in United States coins during the past 20 years or so. We believe this parallel may be in the coinage of some of the English-speaking countries.

For those forward looking investors who may also be thinking along these and similar lines, we would like to recommend the EMPIRE INVESTORS REPORT as an investment service which, among other things, gives good, in-depth coverage of the investment possibilities in foreign coinage.

The following is a quote from their October 28th issue:

"Growing steadily, the interest in Canadian coins has grown until prices today are 1000% or more, in many instances, above the prices of ten years ago . . .

. . . In more recent years, there has been a growing interest in Mexican coins and in coins of Great Britain. Coins of Great Britain especially have a long way to go to catch up to the prices of comparable Canadian or United States issues." (Editor's note: a long way to go in price, but not necessarily in time. Herein lies the astute investor's opportunity.)

"Today the vast field of foreign coins is largely untapped by American collectors. We believe that foreign coins will be the next big thing in the coin business."

Also in the October 28th issue of Empire Investors Report will be found a complete list of all uncirculated dates and mints of the Mercury dime series, with appropriate comments on each one. This complete coverage of the Mercury series should be in the files of all investors interested in non-current series of United States coins.

All in all, we feel that this issue of Empire Investors Report is an informative report that will be of great value to all serious investors. We recommend it highly.

A MONDAY MORNING REPORT ON THE WHOLESALE COIN MARKET AS IT CLOSED FRIDAY AFTERNOON

November 15, 1963

1955-P DIME RISES SHARPLY

MARKET GENERALLY STEADY

CENTS.

Fairly steady all down the line. Late dates moving up.
1959-P--Still hard to get, with bids at \$2.85 and ask at \$3.00.
1959-D--Moved up to \$1.55 BID from \$1.25 ASK.
1960-P--Up to \$1.55 BID from \$1.45 last week.
1960-Psm--Slowly slowly settling down; strong action on this roll at \$365.00
1963-P--Still very few available.

THE MARKET IN DEPTH

by JAMES G. MILADIN

After carefully observing the coin transactions during the past week, it looks as if all the silver uncirculated coins will lead the coin market back into an upward swing.

For the past two weeks, the market has been in a sluggish mood, depending on a few "big-time" dealers to set quotations with their bid and ask prices, and the rest following along.

This week, trading blossomed out among a greater number of dealers and covered a broader number of coins, indicating the general public is participating in the investing. To borrow a phrase from the stock market, we are definitely into the beginning of a "bull market". As in the stock market, there are also "cats and dogs". (over-priced common dates). Would recommend that a little common sense be used in your purchases, whether it be a long-term or a quick gain.

Lincoln cents are still in a conciliatory position. The small date 1960-P is drifting downward, but believe it won't be very long before it makes a strong comeback, leading the entire series upward again.

Jefferson nickels are steady in both unc. and circ., with profit-taking in the circ. rolls forcing a slight downward draft.

On very solid ground stand the unc. Roosevelt dimes, with the trend definitely upwards. I mentioned "cats and dogs" above, and the majority of the circ. dime rolls that have been heavily traded belong in this category.

Washington and Franklin would be very happy to know that the "sleepers" exist among the coins that bear their portraits. You can share their happiness in these two series.

The final member of the silver clan, the dollars, are consolidating their gains, with the CC series, and especially the 1885, leading the parade.

Proofs are coming out of their doldrums and with a parting word to the wise, do your Christmas shopping early.

EDITOR'S NOTE: Mr. Miladin will be glad to answer any questions concerning his column. Enclose stamped, self-addressed envelope.

NICKELS.

Market steady on all nickels, with narrow margin between bid and ask.
1938-D--Slight rise to sales at \$335.00
1960-P--Heavy action on this one, with heavy buying pressure at \$500.00 per bag in unlimited quantities. This is the one to watch.
1963-P--Few offers to sell.

DIMES.

1953-S--Slow sales; big sleeper.
1954-P & D--Action stirring on these; watch them.
1954-S--Settled down now.
1955-P--Sharp rise, with bids to \$90.00 per roll and almost no sales. This is still blue chip.
1959-P--Still going up. All the slack is out of this one now.
1960-P--Leveled off at \$9.00 to \$9.50.
1961-P--Levelled off.

QUARTERS.

Early rolls very scarce.
1946-S--Still the hot one.
1947-S--Not enough trading to fix a true price.
1955-D--Standing still now.
1958-P--Some sales at \$43.50. This is a good one; watch it.

HALVES.

1953-P--Still steady, with light sales.
1955-P--Still going up, with bids of \$56.00 and asks of \$60.00.

DOLLARS.

1885-CC--Went from \$700.00 to \$800.00, with sales at \$800.00.
1894-P--Offers to buy at \$1800.00 per roll; no sales at this price.

CIRCULATED ROLLS.

Nickels. Not much action; slow sales.

Dimes. 1949-S--Still strong, with good sales at \$32.50/roll.
Some bids of \$33.50.
1955-P--Demand strong, with bids of \$40.00 and very few sales.
Other S mints--Slow, but fair sales.

PROOF SETS.

Climbing steadily, slow but sure.

Editor ORVIL L. PAYNE

The COIN DEALER Newsletter is published by Payne Publishing Co., Inc., a subsidiary of Clearmark Corporation.

Home Office: 14600 South Crenshaw Boulevard
Gardena, California

The Coin Dealer Newsletter reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER Newsletter

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Decimal point in Mintage figures designates millions.

Investment Review

A review of the October 28th issue—
NEW HORIZONS FOR INVESTORS

The following reprint from the October 28 issue of New Horizons is an example of the penetrating insight into the coin investment field that is offered by the editors of this very fine investment service.

"Listen for a moment to a coin dealer who is an old timer and who views the present bull market as not only insanely high but positively evil and immoral. His argument goes something like this: 'Today, investors are coming into the coin market with large amounts of money to invest. There are not nearly enough truly scarce coins to meet this demand. Hence, capital flows into relatively plentiful coins and drives them to a higher price than the scarce coins. The 1955-S coins are an example of this foolishness. All these have been rising strongly. Everyone knew this was the year the San Francisco mint would shut down and hence, unusually large quantities of these coins were saved. Probably, more than half of the 44 million 55-S cents were saved. This is more than enough to supply coin collectors for the next hundred years. Conclusion: the 55-S cent which sells for 125 times face value, should be worth only five or ten times face at the very most.'

SWITCHING FROM
STOCKS INTO COINS

"This conclusion is based on the assumption that the only firm future demand for coins will be from collectors who buy one coin at a time. We question the accuracy of this assumption. First of all, old time numismatists say that the new, uninformed investors who are buying coins are the "get-rich-quick" type. We think only a minority can be classified in this category and they are mainly the larger roll dealers.

"The typical stock market investor invests only a small portion of his total funds in coins and then holds for long-pull gains. He buys coins to diversify his investments in stocks.

"Moreover, a relatively small amount of money in the stock market is a very large amount in the coin market. Thus, say 10,000 stock market investors invest \$5,000 apiece in coins. This is a \$50,000,000 investment or far less than one day's trading on the NYSE. This would have virtually no impact on stock prices. But think what this sum would do (or is doing) to coin prices!

"Moreover, as stock prices rise so do the number of new issues which automatically helps limit the extent of the bull market. In contrast, the supply of old coins can never be increased. These are the chief reasons we think stock market investors could have a much greater impact on the coin market in future years than coin collectors themselves. These bears who think coins are fantastically overpriced will find themselves in the position of those who thought stocks were "too high" in 1951. They don't realize that established trends last longer and carry further than generally expected.

"Of course, there will be bear markets in coins just as there are in the stocks following periods of speculative excesses. But sophisticated investors will ride out these bear markets just as they do in the stock market and they can do it with even greater confidence that new highs will follow for the above mentioned reasons.

"It is understandably irritating to numismatists (few of whom are so pure that they don't consider the monetary value of their holdings) to see their rare coins selling for less than some more readily available issue. The same relationship has always existed in the stock market. Very "thin" issues tend to sell at relatively lower prices in relation to underlying values because an insufficient supply exists to fill the needs of large investors."

Also in this issue - an excellent report on the 8 TF Dollar. (Which, incidentally, has tripled in price since this article was published). We recommend NEW HORIZONS as required reading for serious investors.

BU DIMES STILL ON THE MOVE

CENTS.

Early dates firm; slow sales.

1958-P--Moving up with sales at \$5.40 a bag.

1959-P--None around, with bids to \$2.95, asks of \$3.05. Heavy buy pressure on these.

1959-D--Heavy buying pressure on these with bids of \$1.60 and sales at \$1.65 in large lots.

1960-Psm--Steady at \$365.00 - \$370.00.

1960-Dsm--Going up; \$17.75 BID, \$18.25 ASK.

1963-P--Still tough, with everyone wanting these. Bidding \$60.00 to \$62.00 a bag in East plus freight.

NICKELS.

1935-P--Early Buffalos still strong, with 1935-P going to \$110.00.

1935-D--Went to \$300.00 BID from \$280.00.

1938-D--This Jefferson went to \$340.00 BID. Not many around her.

1949-S--Bids to \$135.00 per roll; light sales.

1960-P--Jumped to \$5.25 BID, \$5.50 ASK; some sales.

1963-P--Good demand on these at \$2.30.

DIMES.

1949-S--Leading the field with bids of \$700.00 on these.

1950-D--Some sales at \$36.00 BID.

1951-D--Light sales at \$36.00 BID.

1952-P--Rose sharply to \$31.00 BID, with few sales at this price.

1962-P--Bids to \$7.75; light sales. Where are these.

QUARTERS.

1941-D--Went from \$76.50 BID to \$90.00. New trend?

THE MARKET IN DEPTH

by JAMES G. MILADIN

It is difficult to report on anything when your heart is full of sadness.

Whatever our political views, and let us not be the ones to judge his wisdom, our President was felled by an assassin who aimed at us all.

May we who remain give thanks that we are able to spend this Thanksgiving week with our loved ones and all share the bereavement of Mrs. John F. Kennedy and her family.

THE COIN DEALER INVESTOR
teletype newsletter

Editor ORVIL L. PAYNE

The COIN DEALER Newsletter is published by Payne Publishing Co., Inc., a subsidiary of Clearmark Corporation.

Home Office: 14600 South Crenshaw Boulevard
Gardena, California

The Coin Dealer Newsletter reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER Newsletter

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Decimal point in Mintage figures designates millions.

COMPLETE GUIDE FOR PROFITABLE COIN INVESTING

By: DON BALE, JR.

Mr. Bale's title for his book is very descriptive. It is, as far as I know, the most complete guide to coin investment that has been published to date. It covers everything from where to find the mint mark to how to outwit the coin crooks. The beginning investor will find a wealth of information that will help him find just the right place to break into coin investing. The experienced investor will also find many items of interest in this information packed volume.

Being a devotee of coin investment success stories, I would like to reprint below one of the interesting stories from Mr. Bale's book.

"For thirty years a conductor on the Southern Railway purchased quantities of half-rolls and rolls of cents through dimes while travelling throughout the South and East. When he retired in 1945, the value of his oldest coins had increased considerably. He sold his earliest date coins and invested the entire amount in new mintage, continuing to do this year in and year out: 1946, 1948, etc. Eventually, he became one of the nation's top ten dealers and today is worth more than a million dollars!

"Bill Gruber of the NUMISMATIC TIMES & TRENDS explains how the conductor did it:

In 1945 our oldtimer's roll of 1930 cents was worth say, \$20, an increase of 40 to 1 in fifteen years. He asked himself what would happen to these cents if he held them until 1960. Would they increase 40 more times from their 1945 value to sell for \$800? Perhaps this was asking too much. BUT if he took \$20, and bought 40 rolls of 1945 cents at 50 cents a roll, there was the possibility that EACH of the 40 rolls would increase 40 times in value in the fifteen years to come. The 1930 mintage was sold and the money received was put into 1945 coins. The 1931 coins were sold in 1946, the proceeds from which were put into coinage of that year--and so on.

"You, too, can use this 'secret formula' that hundreds of investors are following today."

November 29, 1963

SINGLE SILVER DOLLARS RISE SHARPLY

CENTS.

Some cents still active with these leaders remaining the "Hot Ones".
1959-P--Where are these? Unlimited bids for any amount.
1959-D--Up another \$5.00 per bag. Volume bids.
1960-Psm--Down again to a low of \$345.00 ASK.
1960-Dsm--Firming up again at around \$18.00 BID.
1963-P--Still in demand at steadily increasing prices.

THE MARKET IN DEPTH

by JAMES G. MILADIN

With the uncirculated silver coins leading the march, the coin market in its abbreviated week showed good strength with only a few exceptions.

In the Lincoln Cents there is a slight degree of weakness with the 1955-S drifting lower. Efforts are being made to shoot up the 1960-D in both uncirculated and circulated but the drive seems to fizzle out. The 1960-P small date seems to be acting in a normal pattern, with trading volume low while on a downward move. In my charting the low point is in the \$340.00 to \$345.00 range, but I wouldn't recommend waiting to buy in this range. This is a very volatile roll and it could easily go up \$100.00 before it comes down \$10.00.

With prices firmly established, trading was quiet in both the uncirculated and circulated Jefferson rolls. I don't look for any great rise in this series while normal profit taking is taking place, although the trend in the immediate future is upward.

The Roosevelt Dimes are continuing in their leadership of the coin market. With all uncirculated rolls in demand, especially the cheaper, earlier dates. This series is very much sought by both short and long term investors. A second breath has been given the 1955-P-D-S group and with the circulated 1955-P giving evidence of heading for the next plateau.

As in the dimes, the cheaper Washington Quarter rolls are being ferretted out with prices advancing briskly. The 1955-D rise has been temporarily stalled after a spurt of 125% within 90 days, this is a normal and corrective situation.

Plodding along are the Franklin Halves. Although there are many offers to buy, the sellers are few. It seems that very few uncirculated rolls were put away. Today's asking prices are the bargains of tomorrow.

Rapidly overtaking the Roosevelt Dimes for leadership are the Silver Dollars. With the 1964 Kennedy Dollar close to becoming a reality, this will give added acceleration to the dollar group. Personally, like many others, I have never collected uncirculated dollars. But, I'm getting the fever and I had better go out and buy myself a few rolls.

P.S. If my wife, Pauline, will let me!

NICKELS.

Good action on all Buffalos.

1938-S--Eased down. A scattering of rolls offered at \$360.00.

1948-S--Bids to \$80.00; up from \$75.00.

1956-P--Went from \$10.50 BID to \$11.50 BID. Very elusive coin sleeper at this mintage.

1956-D--Coming to life again! Bids of \$9.50, with offers to sell at \$10.50. With less mintage than the 1955-D, this one could lead late date "D" nickels back.

1960-P--Still hard to get! Strong bids at \$5.25.

DIMES.

Still the hottest items. All dimes moving up.

1946-D--Spectacular rise, with bids to \$25.00.

1950-D & 1951-D--Hand in hand. Bids to \$43.00 each.

1952-P--Many bids at \$28.00, with some sales as high as \$30.00.

1955-P-- The leader!

1956-P--Another sharp rise, from last week's \$9.00 BID to this week's \$14.00 BID.

QUARTERS & HALVES.

Steady action in this market, with most drastic increases in 1953-S quarters, up to \$38.00 BID from \$33.00. 1953-S halves up to \$26.00 BID from \$23.00 BID.

DOLLARS.

The "Bull" in the market this week is the silver dollar, with these leaders:

1880-CC--Up from \$20.00 to \$26.50 BID.

1881-CC--\$28.50 to \$42.40 BID.

1883-CC--From \$12.00 to \$14.00 BID.

1884-CC--\$15.00 to \$22.50 BID.

1885-CC--\$30.00 to \$42.50 BID.

1885-S-- From no bid up to \$4.00 each.

1886-S-- No bid to \$14.00 each.

1887-S-- No bid to \$5.00 each.

1888-S-- Up to \$17.50 from \$12.50.

The Coin Dealer Newsletter reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER Newsletter

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Decimal point in Mintage figures designates millions.

Investment Review

A review--

NEW HORIZONS, NOVEMBER 25, 1963 ISSUE

Silver Dollars are presently enjoying a major share of attention from both collectors and investors. We believe this attention is eminently justified both by mintage and popularity. The following reprint is part of a very penetrating article on this series.

"Until recently coin collectors favored cents, nickels and dimes. The least popular coin was - and by a wide margin - the most esthetically pleasing of all U. S. coins: the Morgan silver dollar. This situation is rapidly reversing and, in our opinion, the time is approaching when the silver dollar will be the most sought after coin - especially by investors. Moreover, dollars are relatively cheap in relation to the minor coins. To illustrate: The 1909-S V. D. B. cent with a mintage of 484,000 sells for \$300 each and large quantities of this coin were saved since it was the year the Lincoln head first appeared. Then too, only a fraction of the year's run were struck with the designers initials on the obverse side so it was quite clear that this would be a collector's item.

"In contrast, when we first mentioned the 1878-P (Philadelphia-no mint mark) silver dollar with 8 tail feathers it was selling for less than \$5 and still retails at only \$12.50 each. Yet, only 416,000 of these coins were struck. Unquestionably, there are fewer BU (brilliant uncirculated) 1878-P t.f. in existence than there are 1909-S V. D. B. cents and, in our opinion, most coin investors will live to see the day when the 8 t.f. dollar sells above the 1909-S V. D. B. cent. The day will come when all key silver dollars will sell for more than minor coins of comparable mintage. There were 866,000 1931-S cents produced and a coin in Fine condition sells for \$40. In comparison, the 1879 CC dollar which has more than 100 times the intrinsic value of the cent and is far superior as an art object sells for only \$5 each in Fine condition.

"But this supply-demand relationship is in the process of changing and the rate will accelerate now that the last of the silver dollars are emerging from the mints and the treasury. In fact, now is the final opportunity to buy silver dollars near face value or key coins at relatively low prices. This is an opportunity that will not recur. Future generations will look back with envy at those who were fortunate enough to have such an opportunity and astute enough to take advantage of it."

We believe silver dollars are destined to continue their popularity and consistent price rise, if for no other reason than the staunch support and fine analysis of this series by the NEW HORIZONS INVESTORS REPORT.

THE COIN DEALER NEWSLETTER recently carried an item on the Tonga Coin Stamps. We have had many letters and requests for copies of the issue carrying this item. We regret that we are sold out completely on this back issue, however, the November 25, issue of New Horizons has a very fine article on these stamps.

In writing to New Horizons, we would appreciate your mentioning The Coin Dealer Newsletter.

DIMES - DIMES - DIMES - DIMES

THE MARKET IN DEPTH

by JAMES G. MILADIN

Contrary to previous years, there is no pre-holiday slump in trading, if the past week is any barometer. Prices in general remained steady, while in a majority of the uncirculated silver coins, the demand seemed greater than the supply, forcing many prices up to new highs.

In the Lincoln cents it seems there was more trading in bags of the past five years, with prices inching upwards. Single rolls in earlier years remained steady, with the 1954's and 1955's still drifting lower. Until some leadership is shown by any or a group of dates, the Lincolns don't seem to be going anywhere.

Trading was the quietest I have seen (since the advent of the teletype), but prices remained steady in the uncirculated Jeffersons. In the circulated rolls, prices were lower, with fewer offers to buy.

As in previous weeks, the uncirculated Roosevelt dimes are continuing to show their leadership, with all the dates being traded frequently--most of them at new highs. The 1955 PDS group are well on their way to new higher ground, and it seems there is very little resistance in their path. Outside of the top-priced four, look for advances in all the others.

Activity in Washington quarters increased, with advances posted all along the line. Most all offerings were bought at ask prices, with very few bid prices honored. Look for a continued advance in this series, which show no apparent sign of weakness.

Tempo increased in Franklin halves, in both rolls and single complete sets. In my opinion, any roll in this series will show a handsome profit in the years to come.

Trading in dollars retained its activity. All the select rolls edged upwards to new highs, with many spectacular advances. The common rolls were traded at their previous prices. In other words, "The rich got richer, and the poor stayed poor."

All proof sets were in demand, with prices on the upgrade. In relationship to the price of the 1955-P mint set, look for a sharp rise in the 1955 proof set.

In closing, I am glad to see many of the coin dealers inviting the public to view their teletype operations. Where would American industry be if all the brokerage houses operated in little closed-off back rooms?

CENTS.

1953-P--Slight rise to \$7.00 bid.
1954-S--Offered at \$19.75.

BU ROLL PRICES VS MINTAGE

With this issue we are happy to welcome Dr. Thomas to the staff of Coin Dealer Newsletter. His article on page two of this issue is the first of what we expect to be a long series.

Dr. Thomas holds a Ph. D. degree in Geology and is a petroleum geologist by profession and a student of coin price trends by avocation. He operates a highly successful coin investment advisory service aimed at helping beginners and others too busy to watch coin market trend closely.

THE COIN DEALER INVESTOR
teletype newsletter

Editor ORVIL L. PAYNE

The COIN DEALER Newsletter is published by Payne Publishing Co., Inc., a subsidiary of Clearmark Corporation.

Home Office: 14600 South Crenshaw Boulevard
Gardena, California

The Coin Dealer Newsletter reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER Newsletter

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Decimal point in Mintage figures designates millions.

BU ROLL PRICES vs MINTAGE

DR. E. P. THOMAS

All people experienced in coins recognize that there is not necessarily a close relationship between total mintage figures of any particular coin issue and the number saved as uncirculated. BU rolls of high mintage coins are sometimes quite scarce and command high prices. However, the general buying public still leans heavily on total mintage figures in basing purchasing decisions. The writer recently completed a detailed statistical study of BU roll prices vs. mintages in an effort to determine how close this relationship might be. Prices were plotted against total mintages on semi-log chart paper and a weighted average line drawn through the various points. Allowance was made for age and all series of coins currently being minted were charted. The results were rather startling. Truly Scarce issues relative to their mintage naturally appear far above the median lines. Most issues fall within 30% or so of the median line, indicating that total mintage figures are a fairly accurate criterion as to prices. Perhaps the most interesting issues were those falling well below the median lines. We prefer to call these 'behind the market' issues and will discuss them in more detail later. Results of this study are summarized below:

COIN SERIES	GROUP A SCARCE ISSUES	GROUP B AVERAGE	GROUP C 'BEHIND THE MARKET'

FRANKLIN HALVES (1948 to date)	1949P 1949D 1949S 1950P 1950D 1951S	ALL OTHERS	NONE OUTSTANDING

SUMMARY AND CONCLUSIONS-- As might be expected, the older issues predominate in Group A amongst the cent and nickel rolls, with very few of the scarce rolls being later than 1942. However, when we come to dimes, quarters and halves, we find many relatively scarce rolls in the late 1940s and early 1950s. Obviously, not many investors or collectors became interested in saving these latter rolls until the roll market boom started in earnest in 1955. For some unknown reason (probably due to high mintages) dime rolls were very much neglected. Group A contains many of the blue-chip investment rolls available. Doubtless as the years go by, some rolls now placed in other groups will join this select group. However, we feel that some of the best buys on today's market are to be found in Group C. Many are youthful issues which have not had time to consolidate their position. As they work into stronger hands and become more dispersed, their prices should out-perform the general average and we feel that at least a 50% rise is necessary to bring them in line with kindred issues. In particular, we like 1942D and 1943D cent rolls at current prices. Our own efforts to buy have convinced us they are much scarcer than their prices indicate, particularly in good quality. We will welcome dealers' comments on this observation. We also feel both the Small Date cent rolls and 1958P nickels have very bright futures.

COIN INVESTMENT: GROWTH INDUSTRY

By CARL W. RITTER
The San Diego Union's Financial Editor

Investment in coins--speculating in coins, if you prefer--is apparently destined to move along professional lines to business heights that some of the regional stock exchanges would be happy to attain. Daily sales figures running into hundreds of thousands of dollars reported by a new dealer organization linked by tickers may be startling to anyone who observed haphazard coin transactions in years past. Numismatic investment conditions began to improve markedly about three years ago, when a weekly newspaper called "Coin World" made its first appearance. Bid-and-Asked coin prices were printed regularly so that coin holders came to have a fairly good idea where they stood in the market week by week.

THIS WEEK'S MARKET...

MARKET ACTION CONTINUES IN DOLLARS---DIMES RUNNING A CLOSE SECOND

More action in dollar rolls than anything else, with dimes running a close second. CC mints lead the upward surge; O mints are the sleepers.

CENTS.

1948-S--Strengthened to \$48.00 bid.

1952-P--Firm at \$24.00.

1957-D--Softened a little, with new hoards uncovered. \$1.70 ask.

1959-P--Easing off to \$285.00 ask.

NICKELS.

1947-D--Up slightly to \$33.50 bid.

1954-S--Firming up at \$23.50 bid.

1960-P--Still going up, slow but sure. There appears to be big money behind this one. Strong bids for any amount, at \$5.25, and buyer pays freight.

1961-P--Moving up.

DIMES.

Great demand for early uncirculated Mercuries.

1946-P--Still going, with bids of \$20.00.

1946-D--Sold as high as \$50.00.

1947-D--Continues to rise; bids now at \$42.00.

1948-50-51-D--Pushing upwards; bids to \$48.00 and few sales.

1953-S--One buyer bids \$7200.00 for a bag.

1955-D--Still surging up; \$70.00 bid, with some sales.

1956-D--This low priced coin, going along with the crowd, moved up to \$6.90 bid.

1958-P--\$37.00 bids and no offers; 12% increase over last week.

QUARTERS.

Not much action on these. Lots of shoppers for 42-S and 49-P, but none available.

HALVES.

1948-D--Upward surge to \$53.00 from \$50.

1953-S--Still going up; \$32.00 bid.

1953-P--\$95.00 bid on this; a 19% increase in 7 days.

1954-S--On its way; now \$29.00.

1955-P--This goodie slowly easing upward.

1956-P--Sliding up to \$27.00 bid from \$24.12% on your money in a week.

1957-P--This cheapie still trailing.

1958-P--Easing up, with sales at \$24.00. (Continued on page 8)

THE MARKET IN DEPTH...

by James G. Miladin

With the holiday season drawing near, trading in volume dwindled off during the past week. Many rolls in all categories were offered for sale, and many were asked for; but fewer transactions actually took place. It seems that the roll market will be very selective for the next few weeks.

Volume in bag trading in the late Lincoln cents dwindled off with prices remaining steady. There was very little action on other uncirculated rolls with prices on a slightly down side. The small date 1960-P remained at a solid \$340.00. Personally, I know of one offer to buy 30 rolls at \$10,000.00 and the order was not filled. It looks as if the bottom has been reached on this key cent.

Trading increased slightly in the Jefferson Nickels in both uncirculated and circulated with a very slight change in prices of the past month. Prices have steadied in this series and don't look for any softness; the only exception possibly being the silver nickels.

Interest in the Roosevelt Dimes is still strong, with many behind the market issues still climbing. Although the volume was not as great as in the previous weeks, prices were firm. Many rolls have jumped to new highs on a small volume, indicating there are not as many uncirculated rolls around as many thought there were.

Quantity of uncirculated rolls is best shown in the Washington Quarters. The supply is very small in the earlier years, 1941 thru 1954 and prices are best reflected

appearance. Bid-and-Asked coin prices were printed regularly so that coin holders came to have a fairly good idea where they stood in the market week by week.

This newspaper, published in the little town of Sidney, Ohio, has increased its net paid circulation to 119,230 since startup in 1960. The most recent edition, moreover, contained 112 pages.

But the greatest impact via improving communications in the coin market probably lies in an expanding network of teletype machines linking coin dealers in leading cities throughout the nation.

Already, approximately 150 dealers are receiving quotations and coin requests through this wire setup. Webster Electric Co., meanwhile, is said to be developing a new kind of teletype machine for American Telephone & Telegraph Co. to install in November to serve some 200 coin dealers.

The new machine would operate 24 hours a day, seven days a week, automatically cutting-in to bring private messages to dealers while still serving them with general reports. It would provide two-way communication.

"The load is so heavy we can't get all the messages over the present machine in an eight-hour day," explains Richard E. Martin, co-partner with A. A. Cutler in San Diego Coin Exchange, which has had its teletype only a few months.

Martin says buy-and-sell transactions often involved more than half a million dollars a day and sometimes exceed \$1 million in the dealers' association comprising the network. Members are reported to be working to establish general rules of pricing and market conduct.

Dealers alert to the times are aware that a government agency could enter the picture and draw up regulations arbitrary if the coin people appear incapable of shaping up to destiny through self-regulation.

Coin collectors are estimated to exceed 10 million in the United States. Martin says perhaps 95 per cent can be considered investors -- distinguished from hobbyists -- because they double up on certain coins in their collections.

New Horizons, a publication specializing in unique investment opportunities, notes

EDITOR Orvil L. Payne
ASSOCIATE EDITOR
Eileen Lawson

The COIN DEALER TELETYPE NEWSLETTER is published weekly by Payne Publishing Co., Inc., 13725 South Normandie Avenue, Gardena, California, D. W. Hall, president.

The COIN DEALER TELETYPE NEWSLETTER reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER TELETYPE NEWSLETTER

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Mintages are shown in millions.

Investment Review

Memorial Cents - A Fail-Safe Investment

Recently we predicted a 10% advance in price of the Memorial Cent Series over a 6 month period. How wrong we were. The 1959 Lincoln has advanced 100% in price in the last 30 days and all other bag prices have advanced at least 50%.

Think of the potential value of a roll set of Lincoln Memorial cents a generation hence. Start now and add to it as the years go by. This could be the means of a college education for your children or your insured comfortable retirement.

As a comparison, if one had started in 1941 and invested \$1.50 a year to date in BU rolls of Lincoln cents, that set has a market value of \$1,800.00 today. Tomorrow is but a reflection of the past. What will a Memorial cent set be valued at in the next generation?

Now is the time, this is your opportunity if you really want to better yourself financially in the latter years of your life— Don't just set and "dream." This is a "fail-safe" investment.

Lay the foundation for a future fortune that will be considered a capital gains investment.

If, in 1968, you have invested in a bag set of Memorial cents, a very conservative es-

timate of their value would be \$10,000.00, representing a cash outlay by you of less than \$2,000.00, a profit of \$8,000.00 which would be treated as a capital gain for tax purposes, yet would have 20 bags of pennies at \$50.00 a bag, or \$1,000.00 actual cash in hand, and God help us all if you can't spend them. Accumulate this series over a 20-year period.

A bag set of Lincolns from 1941 to date is worth approximately \$280,000.00—1941 is not so long ago—1983 is not so far away either. \$100.00 a year for the next 20 years will lay the foundation of a fortune.

Editors Note: The above article is a reprint from "Coincontact," a monthly investment paper of 8 pages which makes no bones about being in the business to sell coins. The paper is nevertheless packed with good information and rambling dissertations on many phases of coin investment. In the words of the Editor "Quote from Ad Copy" we believe the two dollars per year subscription price is a "best buy" in investment literature.

(Subscription information in bibliography on back page)

COIN INVESTMENT: GROWTH INDUSTRY (Continued from page 1)

that a \$50,000 investment in the Dow Jones Industrials in 1955 would be worth approximately \$82,000 today. But \$50,000 invested at that time in the 1955-S cent (minted at San Francisco) would be worth \$3 million now.

Two investors made that specific coin investment in 1955, the publication reports.

When this kind of money is involved it is not surprising that the Topsy-like growth industry of numismatics is yielding to order. Quotation boards are displaying up-to-the-minute coin prices taken from the wires in many progressive establishments. The spread between buying and selling prices are no more confusing than in the over-the-counter stock market.

Significantly, several stock brokerage houses have begun dealing in coins as a sideline.

In view of population trends coupled with ordinary supply and demand factors, the potential of numismatics is undeniably great.

(Next week: Conclusion)

Editors Note: This is the first of two articles on investing in coins which appeared recently on the financial page of the San Diego Union. This article, along with many others appearing on financial pages throughout the country, illustrates the high level of interest in coin investment being shown by the financial community.

THE MARKET IN DEPTH . . . (Continued from page 1)

in this group. The demand is far greater than the supply and prices will never be lower in this group than they are today. With interest in this series increasing, a word to the wise is sufficient.

The ugly duckling, the Franklin Half-Dollar is finally coming to his own, and should assume the leadership of the coin market for the balance of the year. Interest in this series was awakening previous to an announcement of the Kennedy Half-Dollar. While on this subject, many say it will be a Commemorative Half-Dollar, others contend it will be a regular issue. I'll string along with President Johnson who wants it to become a regular issue. Back to the Franklin Halves which have been under-priced ever since their inception. During the past week, the 1953-P soared close to the century mark, with practically all the keys becoming harder to obtain. I only hope that many readers heeded my honest advice of the past month.

Trading in bags of dollars was as common as the cents. Although the advances were best shown in the Carson City group, they, and the small mintage (under 800,000) seem the solid investments in the dollars.

All the proofs continued to be in demand, with slightly upward prices. Only the small date showed no gain. From an investment point of view, the 1955 is the best buy in this group.

SILVER DOLLARS ... FINAL OPPORTUNITY

Reprint From New Horizons

THE MARKET IN DEPTH ...

by James G. Miladin

Soaring on every transaction - the Franklin half dollars stole the show during the last week. Individual rolls in all dates, single sets, and complete roll sets all were in demand. Although many sales were consummated, the demand was far greater than the supply. Bidding prices were raised hourly, with very few being honored. If the supply of these uncirculated rolls is thin, then the upward trend should continue for the balance of the year. In my opinion, I don't believe a great supply of Franklins exist; and should you want a single set for yourself, go out and buy one after you finish reading this Newsletter - because they'll never be any cheaper.

Trading in Lincoln cents slowed down to a walk, with very little action in either uncirculated or circulated rolls. There were many uncirculated rolls and bags offered, but actual transactions were very slow. Look for this trend to continue, with a slight softening of prices to stimulate a little action.

Enjoying a breathing spell, the Jeffersons were being traded at practically the same prices of the previous weeks. The only soft spot in this popular series was the silver nickels. This is to be expected after the sensational rise of over 300%

WANT TO INVEST? BU SILVER DOLLARS

\$45 million in silver dollars are now left in vaults in the United States. Of that total, \$2 million have been shipped to Atlanta, Ga., and \$1 million shipped to Birmingham, Ala.

\$15 million in Morgan dollars should be released for the Christmas holidays, leaving a balance of approximately \$26 million in silver dollars that will be held for redemption of the silver certificates.

Any bags of dollars that can be bought at little over face value will undoubtedly reveal choice dates.

Editors Note: The above article is a reprint from Cointact. Subscription information in Bibliography on Page 8.

One thought in the November 25 issue should be repeated and repeated. Namely, "now is the final opportunity to buy silver dollars near face value or key coins at relatively low prices. This is an opportunity that will not recur. Future generations will look back with envy at those who were fortunate enough to have such an opportunity and astute enough to take advantage of it."

Most Federal Reserve banks are cleaned out of silver dollars although we understand new shipment will soon be received. Each year at this time there is demand for silver dollars as gifts, for Christmas bonuses etc. Now is the time to have your bank enter an order for silver dollars to be used as Christmas gifts or bonuses.

Last Christmas as we have related previously, the rare 1898-0 (New Orleans Mint) through 1904-O years were released. These coins had been selling for up to \$1500 apiece and fell immediately to near face value. However, the 1904-O which was recommended in New Horizons at \$27.50 a roll now sells in

the \$40 - \$45 range and will go much higher we think. Probably, no more rare years remain - at least not in any quantity - to be released. But in view of the fantastic rise in silver dollar values, all BU (brilliant uncirculated) dollars should be held especially when the mintage is moderate, that is below 10 million.

In September we discussed San Francisco mint (S) silver dollars and concluded that since large quantities had been melted, it was unlikely any would be released. As it turned out we were proven wrong in short order. A number of bags of the 79-S, 80-S, 81-S, 82-S, 83-O, 84-O and 85-O have turned up in Las Vegas and Montana.

These mintages are all in the nine million range, but unquestionably the number of each outstanding is actually much smaller than the mint figures would suggest. However, no one knows how many of each year were included among the 270 million silver dollars melted in 1918 and the unknown number melted since then. Then too, these years are very

THIS WEEKS MARKET ...

CENTS

Generally slow with some price cutting to stimulate sales. Low volume.

- 1937-P Strong bid \$28.00 for single rolls or \$3,000.00 for one bag.
- 1938-D Sharp drop to \$105.00 Ask.
- 1947-P Strong bid. Few sales at \$30.00.
- 1948-P Strong Bid for bag lot at \$15.00.
- 1949-P Moved up with other P mints to \$25.00 Bid.
- 1952-P Another P mint up at \$26.00 Bid.
- 1954-S Still easing off to \$18.00 Ask.
- 1955-S Still very weak at \$33.00 Bid \$34.00 Ask. Few sales.
- 1960-DSD Moved up to \$18.50 Bid earlier in week. Week ended at \$17.75 Bid \$18.00 Ask. Sales very slow.

NICKELS

Very little action and here also some price shaving to stimulate sales. Low volume.

- 1951-S Showed some strength. Moved up slightly to \$230.00 Bid \$250.00 Ask.
- 1955-P Many offers to sell. Some as low as \$105.00

DIMES

Trading mixed some issues up, some down. Volume generally good.

- 1946-D Interest has subsided somewhat.
- 1954-S Lots of interest. Good volume.
- 1955-P Lower volume at slightly lower prices.
- 1955-D Unchanged.
- 1955-S Showed some strength toward end of week with Bids at \$60.00 for bag lots.

QUARTERS

Fair volume at about the same prices as last week.

- 1954-S Showed good strength. Good volume at up to \$31.00 Bid.
- 1955-D Eased off slightly. No volume at \$119.00 Ask.
- 1958-P Off slightly. Good volume around the \$40.00 to \$41.00 range.

HALVES

A week of fantastic activity in halves with all prices rising sharply. Probably more

EDITOR . . . Orvil L. Payne
ASSOCIATE EDITOR . . .

The COIN DEALER TELETYPE NEWSLETTER is published weekly by Payne Publishing Co., Inc., 13725 South Normandie Avenue, Gardena, California, D. W. Hall, president.

The COIN DEALER TELETYPE NEWSLETTER reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it an almost exact reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER TELETYPE NEWSLETTER

BID columns show the highest price at which dealers are offering to buy.

ASK columns show the lowest price at which dealers are offering to sell.

An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Mintages are shown in millions.

plentiful in circulated condition. Our guess is that there are considerably less than 500,000 of each year in BU condition.

This relatively small release has driven prices far below realistic levels. One reason: A handful of dealers cornered the market by paying their banking and casino connections only a modest premium over face. Due to the nature of their business they must move their merchandise fast and the only certain way to do so is to price it right. The 79-S and 82-S are \$40 per roll (20 coins). The 80-S, 81-S, 83-O, 84-O, and 85-O are \$32.50 a roll.

In our opinion, these coins should be selling in the \$4 to \$5 area and some dealers have them priced that high or higher right now. The above are the lowest prices we have seen for these items. This is why we personally are buying bag quantities to put away, confident that we will realize 500% on our investment within two to three years or perhaps even sooner. If you bought the

S dollars at higher prices this is an unexpected opportunity to cut your original cost price in half.

NOTE: The November 25 discussion of 1878 CC dollars said the recent retail price had been around \$100 a roll. We did not set a firm price at which dealers would sell. Actually, two days after our report appeared, the wholesale price had risen to \$120 and Mr. Busch sold at this price as long as his supply lasted despite the fact that the retail price was then higher.

Editors Note: We are in full agreement with New Horizons that silver dollars are probably the best investment opportunity of the decade. We are buying dollars for our Coin Investors Mutual Fund that is presently being organized. We wish to thank the editors of this very fine investment service for the opportunity to publish this timely article.

THIS WEEKS MARKET . . .

(Continued from page 1)

action in one week in one series than we have ever had before. BU roll sets of halves rose from a Bid price of \$1900.00 to a sale at \$3750.00 asked. Almost a 100% increase in an entire series in one week. This must be a record.

1948-D Big jump from \$53.00 Bid to \$82.00 Bid.

1949-P Strong bids at \$600.00 to \$610.00 up almost 50% in one week. No volume.

1949-S Sharp rise from \$135.00 Bid to \$185.00 Bid. Few sales.

1953-P Fantastic rise. Bid as high as \$175.00 at one time. Some volume.

1954-P Almost doubled in price this week. From \$11.50 Bid to \$21.00 Bid.

1954-S Almost doubled. \$27.50 Bid to \$52.00 Bid. Good volume.

1955-P Probably heaviest traded and most sought after of all the halves this week. Many ask prices being held high as \$100.00 to \$110.00 per roll.

1956-P Probably the second most wanted half of the week. Moved from \$27.00 Bid to \$49.00 Bid with fair volume.

1958-P Heavy demand pushed price from \$23.00 Bid to \$39.00 Bid.

SILVER DOLLARS

Good trading volume in dollars this week. However, this as all other series was completely eclipsed by action in halves. Most medium priced rolls rose in price with good volume. Higher priced rolls steadied and lower priced rolls didn't do much of anything. Most all single roll transactions are at \$25.00, or higher. In those instances where the Bid or Ask price is under \$25.00 this indicates bag quantities.

THE MARKET IN DEPTH . . .

(Continued from page 1)

in this group during the past eight months. Don't look for any softening in the entire series, as it didn't follow the trend of their silver brethren.

Texas is at it again. They are bound to own every uncirculated 1955s dime. With a powerful investment group behind him, their spokesman announced that he is again buying this popular coin. Although his announcement came in the middle of the week, it had little impact on the entire Roosevelt series. But don't be fooled, as the Roosevelts will rise again after Franklin settles down.

Washington goes along unnoticed, but in his quarters are the real bargains. With interest gradually increasing in the 1941 to date group, many of the cheaper rolls were sought at slightly higher prices. Although there was not much trading in this series, prices were very firm. Supply of uncirculated rolls in this series seem to be very small, especially in the forties; and prices could soar with a low volume.

Volume trading continued in the dollar bags. Buyer resistance seems to be evident in the higher priced rolls, as trading seems to have slowed up in this group. Whether this is temporary, remains to be seen.

Proofs in the 1936 to 1942 group seemed to be in greater demand than in previous weeks, with prices at a slightly higher level. Choice proofs in this era are scarce, and prices could soar with only a slightly greater demand. In the 1950 to 1963 group, trading was on a normal basis, with the 1963 still in demand.

On behalf of the Newsletter staff, let me wish you and your loved ones a very Merry Christmas.

SILVER DOLLARS -- STILL TIME TO BUY

INVEST IN COINS? PRO'S DOING OK

By CARL W. BITTER
The San Diego Union's Financial Editor

Now that teletype communications are being established among progressive coin dealers across the land and daily quotation boards are becoming common in their places of business, a ready market is developing for literally millions of coins.

These coins are bought and sold individually, in sets, in rolls, and by the bag.

Professional investors are buying and selling in many cases without ever seeing the coins, in transactions running into thousands of dollars. Many 'pros' never pick up what they buy, preferring to leave the coins with the dealer until the market price appreciates to a pre-stated selling point, usually a fixed percentage of investment.

The price, of course, can go down as well as up. But in recent years, major bearish mints in the coin world have been exceedingly rare. For example, 1963 coins in uncirculated condition already are bringing a premium.

As to the old coins, Richard E. Martin, co-owner of the San Diego Coin Exchange told the writer:

"Buying coins of the 1700's and 1800's now in an established market is just like buying blue chip stocks."

Martin had just completed a conversation in his office with a professional coin investor in which they had casually weighed a "buy" decision involving \$2,700. The coin investors who make money, Martin said after the man left, usually turn over the merchandise every 60 to 90 days. The big business, he said, is in rolls.

Ten rolls of uncirculated 1950-D nickels this professional bought at \$460 a roll had increased in market value to \$600 a

THE MARKET IN DEPTH...

by James G. Miladin

With the week broken up by Christmas, actual transactions slowed down considerably during the latter half. Dealings were on a selective basis, and it seems this trend will continue for at least another two weeks.

Digressing over events of the past year, the coin business has been mechanized

The past several years have recorded an increasing record of silver dollar withdrawals. This past year, more silver dollars have left the bank storage vaults throughout the country than that of any previous year in our Nation's history. According to the Treasury reports, at the beginning of this past year there were less than 95 million silver dollars in storage. In accordance with the most recent reports, for the past twelve months, 59 million plus, silver dollars have gone into private storage, collections and investors hands, leaving a balance on hand of an estimated 36 million silver dollars...

The following is a break-down of silver dollar withdrawals since 1958. These are official figures, taken from government records.

Balance Beginning Of Year	Amount of Withdrawal
1958 - 219.0 Million	16.3 Million
1959 - 202.7 Million	20.4 Million
1960 - 182.3 Million	21.1 Million
1961 - 161.2 Million	31.1 Million
1962 - 130.1 Million	36.1 Million
1963 - 94.0 Million	59.0 Million

At this rate of flow it will not be long before this small balance of only 40 Million silver dollars left in the Federal Re-

serve and Treasury vaults throughout the country will be completely gone!

There were a total number of 387 Million Morgan dollars struck from 1876 thru 1921. And of the Peace type approximately 191 Million were minted from 1921 thru 1935. The usual yard stick of mint totals has proven to mean very little when it comes to picking a winner in the Morgan dollar series, due to the Pittman Act of 1918 and the subsequent melting of some 270 Million silver dollars and in addition under a wartime emergency act, some 20 years ago 60 Million were melted as uncurrent. Through miscellaneous sources, official data, etc., over 331 Million silver dollars can be accounted for as being destroyed under certain conditions, during the past 45 years.

Because of these factors, increasing demand, diminishing supply, silver content, proof surface, collectors interest, investment potential and low prices, indicates that the silver dollar will be the

THIS WEEKS MARKET...

CENTS

Generally soft with some profit taking to stimulate action. Sales very slow.

NICKELS

Generally soft with year end inventory clearance and some profit taking producing some real bargains in key dates for the sharp buyer. Prices firm somewhat toward end of week.

1940-D Slight gain.

1949-P Healthy interest shown. Increased from \$40.00 Bid to \$48.00 Bid.

1950-D This key showed slight loss.

1951-S From \$230.00 Bid to \$220.00 Ask.

DIMES

Trading mixed, generally downward trend in price and interest. Price shaving did not stimulate sales. Little interest in late dates.

1940-D Slight gain to \$50.00 Bid.

1940-S Sharp rise from \$43.50 Bid to \$52.00.

1946-S Up to \$63.00 Bid with sales.

1947-P Levelled off.

1947-D Interest increasing.

1949-D Interest indicated this week.

1950-P & 1950-D Buyers market this week.

1950-S Continues firm with other price drops.

1951-S Decline to \$425.00 Bid with sales.

1953-S Up to \$73.00 Bid with sales and down to \$53.00 Bid with sales. Activity did not stabilize.

1955-D From \$70.00 Bid to \$58.50 Ask, but sales at each end of the scale.

QUARTERS

Generally slow up until the end of the week when a whirlwind of bidding swept prices upward for most of this series. This action occurred too late in the week to evaluate this new trend, however, it could be a trend that will bear watching through this next week. Most active dates were the late 40s and early 50s.

1940-D Interest indicated.

1943-S Up from \$90.00 Bid to \$95.00 Bid.

1944-S Up from \$37.00 Bid to \$44.00 Bid.

THE COIN DEALER teletape newsletter

Vol. 1, No. 28 December 27, 1963

EDITOR . . . Orvil L. Payne
ASSOCIATE EDITOR . . .
Eileen Lawson

The COIN DEALER TELETape NEWS-LETTER is published weekly by Payne Publishing Co., Inc., 13725 South Normandie Avenue, Gardena, California, D. W. Hall, president.

The COIN DEALER TELETape NEWS-LETTER reports the national coin market as it closed Friday afternoon. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

HOW TO USE THE COIN DEALER TELETape NEWSLETTER

BID columns show the highest price at which dealers are offering to buy.
ASK columns show the lowest price at which dealers are offering to sell.
An asterisk (*) next to a price indicates that a transaction was completed at that price.

Where an item has no price entered, there was no offer to buy or sell outstanding as of the close of business, even though transactions may have occurred earlier in the week. This leaves you with a picture of the market as it actually stood at the close of business on Friday afternoon.

Most prices on lower priced rolls are in bag lots.

Mintages are shown in millions.

Letters to the Editor...

Dear Sir:

"Why, when the bid and ask price are given as the same, is there not always a sale as indicated by an *? This was the case with 1938-P Jefferson nickels in the November 22, 1963 issue. Are these offers just meaningless?"

This situation is usually brought about because of timing. Contrary to the popular conception, communication between all the dealers on a large teletape circuit is far from being instantaneous. Due to the large number of dealers on these systems, they are generally broken up into circuits of about 30 dealers each. All the circuits comprising the system then feed through a central relay station. Each dealer then has instantaneous communication with the other dealers on his particular circuit, however, in order to reach a dealer on one of the other circuits comprising the system, his message must first be sent to the control center where it is first recorded and then retransmitted to the circuit or circuits for which it is intended.

If a dealer wishes to buy a quantity of a particular coin he usually sends his buy order to his own circuit and to the control center to be relayed to all the other circuits. There are times when the traffic on all circuits is extremely heavy, so that the time for completing this operation can run into several hours. The man who has these coins for sale at the bid price must then go through the same procedure to get his message back to the buyer, thus consuming more time. Realizing this, the seller quite often picks up the telephone and contacts the

roll in four weeks. At the time the material for this column was compiled, the nickel rolls were quoted at \$600 on the sell side and \$620 on the buy side.

The growing importance of coin collecting and investing is indicated in a new federal directive, tightening internal regulations affecting coins and coin metals at Philadelphia and Denver mints. It states:

"No employee shall convert to his use or the use of another, any bag of coin, individual coin, coin blank or coinage metal in any form, belonging to or held by the U.S. government.

"Unless specifically authorized, no employee shall review, examine or inspect any bag of coin, individual coin, coin blank or coinage metal in any form, for possible premium or numismatic value."

buyer directly to make the sale, thus completing the transaction outside our range of knowledge.

Another dealer, not having seen the original offer to buy for various reasons may offer these same coins for sale at the same price. Thus, we have a buy and sell offer at the same price with no sale recorded, although both offers are legitimate.

There are at least 100 other variations of this same situation possible and I am sure that after reading the above explanation of some of the mechanics of the teletape system you will be able to see many of the difficulties involved in making an exact report of such an inexact market.

The compilers of this market report are thoroughly familiar with the intricacies of teletape trading and you may rely on their judgment and knowledge of these situations to produce figures that will accurately reflect the true market.

THE MARKET IN DEPTH . . .

(Continued from page 1)

thru the advent of the teletype circuits into an industry. Previously it was the collector, dealer and speculator who set prices, whether it be a single coin or a roll. During this mechanization period a new type of person has entered the field - the investor. Although he may know very little about coins, he is a shrewd business man. If in the beginning of his investment program, he sees he has made a bad deal, he will sell and take his loss; otherwise that coin, roll or bag is put away and for the present - forgotten.

It is very hard for the average collector (and some dealers) to accept today's prices; but when you analyze that there are only so many coins available and with many investors entering into the coin field--whether they be a "she" or a "he"--there is only one way the good material can go, and that is--up.

That is our job at the NEWSLETTER. With our many associates, we try to bring you the actual prices and report the market as truthfully as is humanly possible. Personally, with my 30 years experience as a collector, dealer, speculator and now joining the ranks as an investor, I endeavor to give my honest opinion to you readers. I realize the majority of you can buy and sell me many times over, but knowledge and experience are priceless.

Next week I will look into my "Crystal Ball" and try to foretell what the next year will bring into the coin picture. As a preview, I will say, "it will have a bearing on what little Jane and Johnny will be putting into their coin albums 5 years from now".

Until then, may I wish that all of you enjoy the best of health and happiness in the coming year; and many years to come.

P.S. Before the starting gate is sprung, suggest you have a little bet on the following three uncirculated rolls: 1955-S dime, 1898-O dollar and 1904-O dollar.

If you really want action, key your ad to the bid and ask prices.

SILVER DOLLARS---STILL TIME TO BUY

(Continued from page 1)

Hot Items for Sixty Four' and one of the biggest profit makers available to the coin buying public.

Confirmed information has it that the month of November and the first part of December 1963, large and heavy movements of silver dollars were shipped throughout the Federal Reserve System. The following locals received the largest shipments. Denver... Los Angeles and San Francisco. It is rumored that this is the final distribution of quantity shipments to the Federal Reserve's Western Districts.

To date, here is a list of uncirculated silver dollars being found in Montana - Nevada and California: 1879 S; 1880 S; 1881 S. 1882 S; 1883 O, and 1884 O.

For Wyoming and Colorado area here is a confirmed listing of findings: 1878-P (7 TF) 1879 P; 1880 P, 1881 P; 1881 S; 1884 O. 1887 P; and the 1900 P.

Because of this issue of the 'INVESTOR' being somewhat general in its report on silver dollars our recommendations will be also. The following list of silver dollars must be classified as Sleepers and should be purchased in whatever quantities possible.

Listed In Order Of Mint Totals:

1899	330,846	1885 S	1,497,000
1893	378,792	1887 S	1,771,000
1880 CC	591,000	1878 CC	2,212,000
1888 S	657,000	1892 O	2,744,000
1889 S	700,000	1897	2,822,731
1886 S	750,000	1904 O	3,720,000
1892	1,037,245	1898 O	4,440,000
1883 CC	1,204,000	1903 O	4,450,000

Of those issues listed here, some have experienced recent price advances, some have not moved in over a year. At the present time, many of these dates can be bought without too much difficulty; however, time is short. Prices are expected to go a great deal higher in the very near future. Of the ninety some pieces within the series, the sixteen dates listed should give the investor the largest return on his dollar invested. There are other dates of the series which could be included in this group, but to save any confusion we have chosen to hold this down to a bare minimum. In later issues of the 'INVESTOR' we will give a complete analytical summary of market date, price history, trends, etc., of these and other silver dollars, including the Peace series.

Editors Note:

The above excerpts are only the highlights from a very complete five page report on silver dollars appearing in the December issue of International Coin Investor.

I. C. I. is one of the leading coin investment services and is on the "must read" list in our own offices. We recommend it highly to anyone interested in coin investment.
